After The Monkey Trial Evangelical Scientists And A New Creationism:

After the Monkey Trial Christopher M. Rios, 2014-08-28 This study sheds light on the work of the evangelical scientists who sought to bridge the cultural divide Christianity and evolutionary theory In the well known Scopes Monkey Trial of 1925 famously portrayed in the film and play *Inherit the Wind* William Jennings Bryan s clashed with defense attorney Clarence Darrow The drama pitting fundamentalist fervor against aggressive agnosticism illustrated what current scholars call the conflict thesis Regardless of the actual legal question of the trial it appeared as though Christianity and science were at war with each other Decades later a new generation of evangelical scientists struggled to restore peace After the Monkey Trial is the compelling history of those evangelical scientists in Britain and America who unlike their fundamentalist cousins supported mainstream scientific conclusions of the world and resisted the anti science impulses of the era Christopher M Rios focuses on two organizations the American Scientific Affiliation and the Research Scientists Christian Fellowship today Christians in Science who for more than six decades have worked to reshape evangelical engagement with science and redefine what it means to be a creationist

The Oxford Handbook of Christian Fundamentalism Andrew Atherstone, David Ceri Jones, 2024-01-18 This authoritative volume offers the fullest account to date of Christian fundamentalism its origins in the nineteenth century and its development up to the present day It looks at the movement in global terms and through a number of key subjects and debates in which it is actively engaged [Righting America at the Creation Museum](#) Susan L. Trollinger, William Vance Trollinger, 2016-05-15 In *Righting America at the Creation Museum* Susan L Trollinger and William Vance Trollinger Jr take readers on a fascinating tour of the museum The Trollingers vividly describe and analyze its vast array of exhibits placards dioramas and videos from the Culture in Crisis Room where videos depict sinful characters watching pornography or considering abortion to the National Selection Room where placards argue that natural selection doesn t lead to evolution The book also traces the rise of creationism and the history of fundamentalism in America

The Warfare between Science & Religion Jeff Hardin, Ronald L Numbers, Ronald A. Binzley, 2018-10-15 A very welcome volume of essays questioning the presumption of irreconcilable conflict between science and religion British Journal for the History of Science The conflict thesis the idea that an inevitable irreconcilable conflict exists between science and religion has long been part of the popular imagination The Warfare between Science and Religion assembles a group of distinguished historians who explore the origin of the thesis its reception the responses it drew from various faith traditions and its continued prominence in public discourse Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals including John William Draper and Andrew Dickson White who through their polemical writings championed the conflict thesis relentlessly Others consider what the thesis meant to different religious communities including evangelicals liberal Protestants Roman Catholics Eastern Orthodox Christians Jews and Muslims Finally essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual

discourse today Based on original research and written in an accessible style the essays in *The Warfare between Science and Religion* take an interdisciplinary approach to question the historical relationship between science and religion and bring much needed perspective to an often bitter controversy Contributors include Thomas H Aechtner Ronald A Binzley John Hedley Brooke Elaine Howard Ecklund Noah Efron John H Evans Maurice A Finocchiaro Frederick Gregory Bradley J Gundlach Monte Harrell Hampton Jeff Hardin Peter Harrison Bernard Lightman David N Livingstone David Mislin Efthymios Nicolaidis Mark A Noll Ronald L Numbers Lawrence M Principe Jon H Roberts Christopher P Scheitle M Alper Yal inkaya

The Crisis of Evangelical Christianity Keith C. Sewell, 2016-04-26 In the broad context of Christianity as it developed over two millennia and with special reference to the last three centuries this discussion finds that Evangelicalism has repeatedly offered a reduced and distorted understanding of the faith The evangelical outlook is much less scriptural than evangelicals generally assume When it comes to appreciating the order of creation our calling to develop integral Christian thinking and living the religious significance of culture and the coming of the kingdom reductionist Evangelicalism struggles with its only rarely acknowledged deficiencies As a result we have all too often ended up with a Christianity shorn of its cosmic scope and wide cultural implications and restricted to institutional church life and the cultivation of private spiritual experience The consequences are frequently enervating and corrosive Without disregarding what is important in the past evangelicals are here challenged to take the Bible much more seriously and thereby transcend the limitations of their habitual reductionism Evangelicals are encouraged to embrace an integral and full orb ed understanding of Christian discipleship that will equip the faithful to address the deep and complex challenges of the twenty first century Evangelicals and the Philosophy of Science

Stuart Mathieson, 2020-11-29 This book investigates the debates around religion and science at the influential Victoria Institute Founded in London in 1865 and largely drawn from the evangelical wing of the Church of England it had as its prime objective the defence of the great truths revealed in Holy Scripture from the opposition of science falsely so called The conflict for them was not between science and religion directly but what exactly constituted true science Chapters cover the Victoria Institute s formation its heyday in the late nineteenth century and its decline in the years following the First World War They show that at stake was more than any particular theory rather it was an entire worldview combining theology epistemology and philosophy of science Therefore instead of simply offering a survey of religious responses to evolutionary theory this study demonstrates the complex relationship between science evangelical religion and society in the years after Darwin s *Origin of Species* It also offers some insight as to why conservative evangelicals did not display the militancy of some American fundamentalists with whom they shared so many of their intellectual commitments Filling in a significant gap in the literature around modern attitudes to religion and science this book will be of keen interest to scholars of Religious Studies the History of Religion and Science and Religion **Designer Science** C.W. Howell, 2025-09-09

Designer Science is the first full length history of intelligent design an antievolutionary movement from the turn of the 21st

century that tried to rewrite the rules of science and had a lasting impact on public perception of science in America The Museum of the Bible Cavan Concannon, Jill Hicks-Keeton, 2019-06-21 Bringing together nationally and internationally known scholars The Museum of the Bible A Critical Introduction analyzes the Museum of the Bible in Washington D C from a variety of perspectives and disciplinary positions including biblical studies history archaeology Judaic studies and religion and public life The Museum of the Bible is poised to wield unparalleled influence on the national popular imagination of the Bible s contents history and uses through time This volume provides critical tools by which a broad public of scholars and students alike can assess the Museum of the Bible s presentation of its vast collection and wrestle with the thorny interpretive issues and complex histories that are at risk of being obscured when private funds put a major museum near the National Mall

Flat Earths and Fake Footnotes Derrick Peterson, 2021-02-17 We are all haunted by histories They shape our presuppositions and ballast our judgments In terms of science and religion this means most of us walk about haunted by rumors of a long war However there is no such thing as the history of the conflict of science and Christianity and this is a book about it In the last half of the twentieth century a sea change in the history of science and religion occurred revealing not only that the perception of protracted warfare between religion and science was a curious set of mythologies that had been combined together into a sort of supermyth in need of debunking It was also seen that this collective mythology arose in the nineteenth and twentieth centuries by historians involved in many sides of the debates over Darwin s discoveries and from there latched onto the public imagination at large Flat Earths and Fake Footnotes takes the reader on a journey showing how these myths were constructed collected together and eventually debunked Join us for a story of flat earths and fake footnotes to uncover the strange tale of how the conflict of science and Christianity was written into history **Global**

Perspectives on Science and Christianity Mike Brown, Keith R. Fox, 2024-09-30 The discussion of how science and Christianity relate to each other is a truly global one Christianity around the world encompasses diverse sets of perspectives ideas and challenges Similarly the practice and perception of science can vary significantly from one region to another When brought together in their global contexts we find a richness in the engagement between science and Christianity that leads to diverse questions and distinctive answers Global Perspectives on Science and Christianity brings together scholars from six continents hailing from disciplines of natural and social sciences theology history and philosophy to provide a unique collection of perspectives on how science and Christianity relate around the world Tackling some issues that are seldom addressed as well as providing fresh perspectives on perennial topics this is an important relevant and genuinely global contribution to the discussion American Creationism, Creation Science, and Intelligent Design in the Evangelical Market Benjamin L. Huskinson, 2020-08-19 In this compelling and thoroughly researched book Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists His work on the Intelligent Design movement is superb and he prompts me to rethink my long held conviction that Intelligent Design is

merely the most recent evolutionary form of creationism This is a very fine book Randall Balmer Author of Evangelicalism in America and writer host of In the Beginning The Creationist Controversy Benjamin Huskinson s study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate He shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler Author of Monkey Trials and Gorilla Sermons Evolution and Christianity from Darwin to Intelligent Design A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate A must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA This book explores the cultural history of anti evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America Separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an off shoot of the creation science movement It demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations

B.H. Roberts, Moral Geography, and the Making of a Modern Racist Clyde R. Forsberg Jr., Phillip Gordon Mackintosh, 2022-03-22 A transdisciplinary Mormon history this book is a work of American religious history theology science history and cultural and historical geography It deconstructs the race creationism White supremacy and Christian imperialism of leading interwar Mormon theologian B H Roberts Roberts hoped to introduce the front rank post Darwinian scientific and philosophical postulates of his time polygeny preadamitism electromagnetism idealism the multiverse infinity and interstellar travel to an increasingly fundamentalist Mormon establishment Church authorities however including eventual prophet Joseph Fielding Smith Jr proscribed and rejected Roberts modernist manuscript The Truth The Way The Life An Elementary Treatise on Theology circa 1930 Paradoxically however Roberts thinking appeared uncited in Smith s 1954 theology Man His Origin and Destiny Here Smith accelerated Roberts racism toward African Americans while reviling science philosophy and free thought This book contextualizes all such fundamentalist Mormon thinking within today s struggle for social and environmental justice and especially the Black Lives Matter movement

Islam and Evolution Shoaib Ahmed Malik, 2021-05-03 This book attempts to equip the reader with a holistic and accessible account of Islam and evolution It guides the reader through the different variables that have played a part in the

ongoing dialogue between Muslim creationists and evolutionists This work views the discussion through the lens of al Ghaz l 1058 1111 a widely known and well respected Islamic intellectual from the medieval period By understanding al Ghaz l as an Ash arite theologian a particular strand of Sunni theology his metaphysical and hermeneutic ideas are taken to explore if and how much Neo Darwinian evolution can be accepted It is shown that his ideas can be used to reach an alignment between Islam and Neo Darwinian evolution This book offers a detailed examination that seeks to offer clarity if not agreement in the midst of an intense intellectual conflict and polarity amongst Muslims As such it will be of great interest to scholars of Science and Religion Theology Philosophy of Religion Islamic Studies and Religious Studies more generally Winner of the International Society for Science Religion ISSR book prize 2022 academic category *Greedy Science* Michael D. Gordin, W. Patrick McCray, 2025-02-18 The authors in this edited collection of essays explore this particular attribute greed by looking how it informed intersected and interlaced with science and technology and scientists and technologists during the 1980s During this decade greed although undeniably present in earlier eras became an extensive expansive and at times explicit characteristic of science both in the United States and around the world 3 The global scientific community was reshaped in a multitude of ways large and small by money fame and the pursuit of celebrity *A Science and Religion Primer* Heidi A. Campbell, Heather Looy, 2009-03 The California missions are unique reminders of a largely ignored part of the history of the United States Nowhere else in the United States can one view such complete remnants of an earlier rule Lands Never Trodden brings to the general public the fullest examination to date of the institutions of the Franciscan missions in California and of the stories hidden in these monuments Franciscan priests Spanish officials and Native Americans all have their stories faithfully reported in this volume Each mission carries with it tales of unremitting labor sacrifice love intrigue passion violence and death This volume treats the familiar stories of the missionaries as well as the previously untold stories of the Native Americans with equal candor With more than sixty photographs and based on exhaustive research and historical documents Lands Never Trodden is an entertaining educational and readable presentation of the twenty one California missions *The Other Side of the Scopes Monkey Trial* Jerry Bergman, 2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin s theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution s philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and

Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals **The God of Monkey Science** Janet Kellogg Ray, 2023-10-10

How to hold true to your faith and embrace modern science Ever since the Scopes Monkey Trial in the early twentieth century American evangelicals have considered scientists public enemy 1 But this antipathy to modern science turned deadly during the COVID 19 crisis when white evangelicals snubbed precautions and vaccines Herself an evangelical Christian and a science educator Janet Kellogg Ray explains how we got here and how to fix it As the follow up to *Baby Dinosaurs on the Ark* this lively volume covers evolution as well as the coronavirus pandemic vaccines climate change and the frontiers of genetic research Ray explains the facts accessibly and with verve Along the way she vividly narrates the scientific achievements and political and religious drama that got us to where we are today Ultimately Ray calls for evangelicals to speak to science rather than deny it We need Christian ethics now more than ever to determine how best to act in light of current scientific data and for love of neighbor If you re afraid of science hurting your faith this book will show you how to be true to both
