Symbolic Power in the World Trade Organization Matthew Eagleton-Pierce, 2013 Questions of power are central to understanding global trade politics and no account of the World Trade Organization WTO can afford to avoid at least an acknowledgment of the concept A closer examination of power can help us to explain why the structures and rules of international commerce take their existing forms how the actions of countries are either enabled or disabled and what distributional outcomes are achieved However within conventional accounts there has been a tendency to either view power according to a single reading namely the direct coercive sense or to overlook the concept entirely focusing instead on liberal cooperation and legalization In this book Matthew Eagleton Pierce shows that each of these approaches betray certain limitations which in turn have cut short or worked against more critical appraisals of power in transnational capitalism To expand the intellectual space the book investigates the complex relationship between power and legitimation by drawing upon Pierre Bourdieu's notion of symbolic power A focus on symbolic power aims to alert scholars to how the construction of certain knowledge claims are fundamental to and entwined within the material struggle for international trade Empirically the argument uncovers and plots the recent strategies adopted by Southern countries in their pursuit of a more equitable trading order By bringing together insights from political economy sociology and law Symbolic Power in the WTO not only enlivens and enriches the study of diplomatic practice within a major multilateral institution it also advances the broader understanding of power in world politics

Handbook of Africa's International Relations Tim Murithi, 2013-09-05 Africa s international relations have often been defined and oriented by the dominant international and geopolitical agendas of the day This new

volume in the Routledge International Handbooks series examines the impact of globalization and contemporary international political changes including the development of the African Union on Africa's international relations. This timely book will engage with and analyse a wide range of issues with chapters written by experts on a variety of themes. African Agency in International Politics William Brown, Sophie Harman, 2013. This book analyses the rapidly increasing role of African states leaders and other political actors in international politics in the 21st Century. In contrast to the conventional approach of studying how external actors impacted on Africa's international relations, this book seeks to open up a new approach focusing on the impact of African political actors on international politics. It does this by analysing African agency: the degree to which African political actors have room to manoeuvre within the international system and exert influence internationally and the uses they make of that room for manoeuvre. Bringing together leading scholars from Africa and Europe to explore the role and conception of African Agency, this book addresses a wide range of issues from relations with western and non-western donors, Africa's role in the UN and World Trade Organisation negotiations over climate change trade agreements with the European Union, regional diplomatic strategies, the character and extent of African state agency and agency within corporate social responsibility initiatives. *African Agency in International Politics* will be of interest to scholars and students of Africa's international relations, African politics, development, geography, diplomacy, trade, the environment, political science and security studies. *The Palgrave Handbook of Africa and the Changing Global Order* Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22. This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge, production, the global economy, global security and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

China-Africa and an Economic Transformation Arkebe Oqubay, Justin Yifu Lin, 2019. This volume considers China-Africa relations in the context of a global division of labour and power and through the history and experiences of both China and Africa. It examines the core ideas of structural transformation, productive investment and industrialization, international trade, infrastructure development and financing. *Africa's World Trade* Margaret C. Lee, 2014-10-09. Are Africa's world markets really contributing to development across the continent for individuals, nations and regions? This is the key question posed by Margaret Lee in this provocative book, in which she argues that all too often the voices of African traders are obscured amid a blizzard of statistical analysis. However, it is these very voices from those operating on the ground as formal or informal traders that must be listened to in order to form a true understanding of the impact trade regimes have on these individuals.
