African American Autobiography And The Quest For Freedom:

African American Autobiography and the Quest for Freedom Roland L. Williams Jr., 2000-01-30 Slave narratives were one of the earliest forms of African American writing. These works autobiographical in nature later fostered other pieces of African American autobiography. Since the rise of Black Studies in the late 1960s leading critics have constructed black lives and letters as antitheses of the ways and writings of mainstream American culture. According to such thinking black writing stems from a set of experiences very different from the world of whites and black autobiography must therefore differ radically from heroic white American tales. But in pointing to differences between black and white autobiographical works these critics have overlooked the similarities. This volume argues that the African American autobiography is a continuation of the epic tradition much as the prose narratives of voyage by white Americans in the nineteenth century likewise represent the evolution of the epic genre. The book makes clear that the writers of black autobiography have shared and shaped American culture and that their works are very much a part of American literature. An introductory essay provides a theoretical framework for the chapters that follow. It discusses the origins of African American autobiography and the larger themes of the epic tradition that are common to the works of both black and white authors. The book then pairs representative African American autobiographies with similar works by white writers. Thus the volume matches Olaudah Equiano's slave narrative with *The Autobiography of Benjamin Franklin*, the *Narrative of the Life of Frederick Douglass* with *An American Slave* by Richard Henry Dana's *Two Years Before the Mast* and Harriet Jacobs' *Incidents in the Life of a Slave Girl* with Fanny Fern's *Ruth Hall*. The study indicates that these various works all recognize the importance of learning as a means for attaining freedom. The final chapter provides a broad survey of the African American autobiography.

The Harvard Guide to African-American History Evelyn Brooks Higginbotham, 2001 This massive guide sponsored by the W E B Du Bois Institute for Afro American Research at Harvard University and compiled by renowned experts offers a compendium of information and interpretation on over 500 years of black experience in America.

A Fatherless Child Tara T. Green, 2014-02-28 The impact of absent fathers on sons in the black community has been a subject for cultural critics and sociologists who often deal in anonymous data. Yet many of those sons have themselves addressed the issue in autobiographical works that form the core of African American literature. *A Fatherless Child* examines the impact of fatherlessness on racial and gender identity formation as seen in black men's autobiographies and in other constructions of black fatherhood in fiction. Through these works Tara T. Green investigates what comes of abandonment by a father and loss of a role model by probing a son's understanding of his father's struggles to define himself and the role of community in forming the son's quest for self definition in his father's absence. Closely examining four works Langston Hughes's *The Big Sea*, Richard Wright's *Black Boy*, Malcolm X's *The Autobiography of Malcolm X* and Barack Obama's *Dreams from My Father*, Green portrays the intersecting experiences of generations of black men during the twentieth century both before and after

the Civil Rights movement These four men recall feeling the pressure and responsibility of caring for their mothers resisting public displays of care and desiring a loving noncontentious relationship with their fathers Feeling vulnerable to forces they may have identified as detrimental to their status as black men they use autobiography as a tool for healing a way to confront that vulnerability and to claim a lost power associated with their lost fathers Through her analysis Green emphasizes the role of community as a father substitute in producing successful black men the impact of fatherlessness on self perceptions and relationships with women and black men s engagement with healing the pain of abandonment She also looks at why these four men visited Africa to reclaim a cultural history and identity showing how each developed a clearer understanding of himself as an American man of African descent A Fatherless Child conveys important lessons relevant to current debates regarding the status of African American families in the twenty first century By showing us four black men of different eras Green asks readers to consider how much any child can heal from fatherlessness to construct a positive self image and shows that contrary to popular perceptions fatherlessness need not lead to certain failure

Elon Dancy II, M. Christopher Brown, 2012-10-01 African American Males in Education Researching the Convergence of Race and Identity addresses a number of research gaps This book emerges at a time when new social dynamics of race and other identities are shaping but also shaped by education Educational settings consistently perpetuate racial and other forms of privilege among students personnel and other participants in education For instance differential access to social networks still visibly cluster by race continuing the work of systemic privilege by promoting outcome inequalities in education and society The issues defining the relationship between African American males and education remain complex Although there has been substantial discussion about the plight of African American male participants and personnel in education only modest attempts have been made to center analysis of identity and identity intersections in the discourse Additionally more attention to African American male teachers and faculty is needed in light of their unique cultural experiences in educational settings and expectations to mentor and or socialize other African Americans particularly males **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative

societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
