economic rationale for the research also provide the impetus to further improve the performance of our techniques This further improvement today is most likely to come from an understanding of the ways our systems work and therefore of their limitations rather than from ideas borrowed from biology From this understanding comes improvement from improvement comes further application from further application comes the opportunity to further understand the limitations and so the cycle repeats itself indefinitely In this volume are papers on a wide range of topics some describe applications that are only possible as a result of recent developments others describe new developments only just being moved into practical application All the perspectives reflect the way this field continues to drive forward This conference is the 15th in an unbroken series of annual conferences on Industrial and Engineering Application of Artificial Intelligence and Expert Systems organized under the auspices of the International Society of Applied Intelligence

e-Business in Construction Chimay J. Anumba, Kirti Ruikar, 2009-01-21 With a number of disparate often geographically distributed organisations involved in the delivery of construction projects there has been considerable interest in e business tools within the construction industry These tools open up a range of possibilities for the industry to rethink existing processes and working methods so their use is increasingly common Nevertheless there has been little definitive guidance for practitioners researchers and students on the major issues in electronic business from a construction perspective By bringing together 16 contributions from research and industry covering theory technological issues practical implementation and legal matters and illustrated with a number of case studies *e Business in Construction* fills that gap Starting with the theoretical aspects of e commerce and moving on to consider the specifics of the construction context it includes a mechanism for the assessment of the e readiness of construction sector organisations The middle part of the book focuses on the role of various technologies in e business with examples included as appropriate This is followed by a discussion of practical legal and trust issues The potential of next generation of information and communication technologies is also addressed With a fine blend of theoretical and practical aspects of e commerce in construction and well illustrated with a number of industrial case studies *e Business in Construction* will find an appreciative audience of construction practitioners researchers and students at all levels
