Runways and Racers focuses on sports car races held at military installations throughout America in the early 1950s It was a marriage of convenience for the Sports Car Club of America and the Strategic Air Command with both parties gaining advantages from the arrangement The thorn in the side turned out to be a Congressman whose own aspirations exceeded his standing but who found himself in a position to be able to influence the outcome of events **Sports Car Market**

**magazine - April 2008 , Imaging light transport at the femtosecond scale** Lorenzo Pattelli, 2018 Paper milk clouds and white paint share a common property they are opaque disordered media through which light scatters randomly rather than propagating in a straight path For very thick and turbid media indeed light eventually propagates in a diffusive way i e similarly to how tea infuses through hot water Frequently though a material is neither perfectly opaque nor transparent and the simple diffusion model does not hold In this work we developed a novel optical gating setup that allowed us to observe light transport in scattering media with sub ps time resolution An array of unexplored aspects of light propagation emerged from this spatio temporal description unveiling transport regimes that were previously inaccessible due to the extreme time scales involved and the lack of analytical models **Northeast American Sports Car Races 1950-1959** Terry O'Neil, 2010 This

book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s The evolution from amateur drivers racing on public roads in 1950 to both professional and amateur drivers racing at private purpose built tracks in 1959 demanded huge leaps of faith trust and understanding The transition was neither easy nor uneventful for drivers clubs or track owners and the tragedy politics and in **Spatial Analysis in Health Geography**

Pavlos Kanaroglou, Eric Delmelle, 2016-03-09 Presenting current research on spatial epidemiology this book covers topics such as exposure chronic disease infectious disease accessibility to health care settings and new methods in Geographical Information Science and Systems For epidemiologists and for the management and administration of health care settings it is critical to understand the spatial dynamics of disease For instance it is crucial that hospital administrators develop an understanding of the flow of patients over time especially during an outbreak of a particular disease so they can plan for appropriate levels of staffing and to carry out adaptive prevention measures Furthermore understanding where and why a disease occurs at a certain geographic location is vital for decision makers to formulate policy to increase the accessibility to health services either by prevention or adding new facilities Spatial epidemiology relies increasingly on new methodologies such as clustering algorithms visualization and space time modelling the domain of Geographic Information Science Implementation of those techniques appears at an increasing pace in commercial Geographic Information Systems alongside more traditional techniques that are already part of such systems This book provides the latest methods in GI Science and their use in health related problems

**Current Trends of Insect Physiology and Population Dynamics: Modeling Insect Phenology, Demography, and Circadian Rhythms in Variable Environments** Petros T. Damos, Sibylle C. Stoeckli, Alexandros Rigas, 2018-06-12

The current eBook collection includes substantial scientific work in describing how insect species are responding to abiotic factors and recent climatic trends on the basis of insect physiology and population dynamics The contributions can be broadly split into four chapters the first chapter focuses on the function of environmental and mostly temperature driven models to identify the seasonal emergence and population dynamics of insects including some important pests The second chapter provides additional examples on how such models can be used to simulate the effect of climate change on insect phenology and population dynamics The third chapter focuses on describing the effects of nutrition gene expression and phototaxis in relation to insect demography growth and development whilst the fourth chapter provides a short description on the functioning of circadian systems as well as on the evolutionary dynamics of circadian clocks

**Climate Change** Houshang Kheradmand, Juan A. Blanco, 2011-09-09 This book shows some of the socio economic impacts of climate change according to different estimates of the current or estimated global warming A series of scientific and experimental research projects explore the impacts of climate change and browse the techniques to evaluate the related impacts These 23 chapters provide a good overview of the different changes impacts that already have been detected in several regions of the world They are part of an introduction to the researches being done around the globe in connection with this topic However climate change is not just an academic issue important only to scientists and environmentalists it also has direct implications on various ecosystems and technologies
