American Made Shapers Of The American Economy 3rd Edition:

American Made Harold Livesay, 2016-11-03 *American Made* is a best selling collection of biographical sketches that introduces key trends of American business. The book details American business through time by presenting the history of people who forever changed the way that Americans do business. Harold Livesay maintains clarity and intellectual acumen while highlighting two themes: globalization and the impact of information technology on business. This edition includes updated stories of its hallmark historical business figures with the latest scholarship as well as additional biographies of figures that have redefined American business in recent years.

Accounting History and the Rise of Civilization, Volume II Gary Giroux, 2017-04-28 Accounting history continues in Volume 2 with six chapters, four supplements, and plus conclusions. Chapters 1 to 3 of the second volume cover specialty topics: specifically auditing, taxes, and government accounting. Chapters 4 to 6 march along from the New Deal to beyond the mortgage meltdown and Great Recession. Supplements include audit opinions, the audit reports written for the annual financial audits, the scandals and corruption associated with accounting fraud, the formal standard setting process creating generally accepted accounting principles (GAAP), and finally computer technology, a key component of the accounting profession and civilization. The concept of accounting as a profession developed by the 19th century as accounting-related services (bankruptcy, taxes, and auditing) became important enough to hire experts and separate businesses to support these functions. Soon licensing was required. Auditing and tax proved to be major money makers for accountants. Accounting firms became mammoth and global, especially the Big 4, providing audit, tax, and consulting services to giant multinational corporations as well as smaller business, governments, nonprofits, organizations, and individuals. The rest of the book covers accounting since the early 20th century when accounting became increasingly sophisticated and important to the commercial and political worlds. The 1920s reverted to free markets, financial market manipulation, and speculation fueled by abundant credit precipitating a boom, then the Great Depression followed by FDR's New Deal. Chapter 5 covers most of the post World War II period. Chapter 6 covers the bubbles and busts of the late 20th century and beyond, with particular attention to Enron. Conclusions summarize the last 10,000 years of accounting, its overall impact on civilization, and predictions for the future.

Knowledge & Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society
