Grundy Z. Leatherberry** Nancy Winniford, 2025-10-04 Mz Grundy s life of adventure began in the summer of 1875 when she was eighteen years old and her journey from Massachusetts to Chicago was chronicled in Book 1 of this series The Adventures of Mz Grundy Z Leatherberry The Quest for Adventure This book The Adventure Continues picks up where the

first left off when Mz Grundy was stranded in Chicago with no place to stay Ya see Mz Grundy was on her way to the Dakota Territory to become a schoolteacher for the newly settled frontier on the prairie along the Missouri River in what is now South Dakota Along the way she was sure she would encounter adventure and fun and she was entirely correct Join Mz Grundy as she rolls across the plains behind a gigantic locomotive then sloshes up the Missouri River on a steamboat Experience her awe and admiration of the frontiersman who catches a fifty foot fish like none she d ever before seen Blush with her as the first young gentleman in her life gives her attention Learn with her as she is befriended by a former slave Feel the adrenalin rush as Mz Grundy leaps and dances around a rattler attempting to bite her Laugh with and at her over her zany moments trying to show up a male horseman attempting to teach the pilot of the steamboat how to steer having her strong will challenged by an equally strong willed soldier and more There are brief historical vignettes as well to explain those bygone times for modern readers who may not know about life in 1875 Don t miss this opportunity to venture into the past and see pioneer life from Mz Grundy s perspective It s sure to make you chuckle ponder and even be glad you are learning history as you enjoy the fictional story

The Color of Civics Matthew D. Nelsen,2023 Generations of Americans dating back to the nation s founding have regarded schools as essential for developing the knowledge and civic values necessary for sustaining democracy Yet as Matthew D Nelsen argues in The Color of Civics traditional approaches to civic education are not living up to their promise for many students particularly students of color from disadvantaged communities How do we prepare an increasingly diverse generation of Americans for full participation in public life Drawing on lessons from students and teachers in Chicago The Color of Civics reimagines the democratic purpose of civic education Nelsen s findings challenge

some of the most widely cited civic education research arguing that the content of traditional civic education courses privileges the political experiences of white political actors and in turn contributes to divergent political behaviors and participatory outcomes across racial and ethnic groups He presents a new approach to civic education that aims to foster political empowerment by centering historically grounded conversations about current events as well as critical categories of knowledge those that highlight the agency and grassroots political action of marginalized groups This approach increases rates of intended political participation among young people of color and heightens political empathy among white youth Nelsen also highlights the agency of teachers in processes of socialization exploring how their attitudes and lived experiences drive the implementation of more empowering civic learning environments By taking the histories and lived experiences of marginalized communities seriously The Color of Civics asserts that civics courses can become spaces where young people begin to recognize their own agency develop empathy and define the terms of their own political participation Including novel empirical research and an evidence based analysis Nelsen provides practical and useful advice for policymakers that cuts through the noise to focus on what works

Nullification and Secession in Modern Constitutional Thought

Sanford Levinson, 2016-09-09 The Missouri legislature passes a bill to flout federal gun control laws it deems unconstitutional Texas refuses to recognize same sex marriages citing the state's sovereignty The Tenth Amendment Center promotes the Federal Health Care Nullification Act In these and many other similar instances the spirit of nullification is seeing a resurgence in an ever more politically fragmented and decentralized America What this means in legal cultural and historical terms is the question explored in Nullification and Secession in Modern Constitutional Thought Bringing together a number of distinguished scholars the book offers a variety of informed perspectives on what editor Sanford Levinson terms neo nullification a category that extends from formal declarations on the invalidity of federal law to what might be called uncooperative federalism Mark Tushnet Mark Graber James Read Jared Goldstein Vicki Jackson and Alison La Croix are among the contributors who consider a strain of federalism stretching from the framing of the Constitution to the state of Texas's most recent threat to secede from the United States The authors look at the theory and practice of nullification and secession here and abroad discussing how contemporary advocates use the text and history of the Constitution to make their cases and how very different texts and histories influence such movements outside of the United States in Scotland for instance or Catalonia or Quebec or even England vis vis the European Union Together these essays provide a nuanced account of the practical and philosophical implications of a concept that has marked America's troubled times from the build up to the Civil War to the struggle over civil rights to battles over the Second Amendment and Obamacare

Chasing the Sun Richard Cohen, 2011-08-04 The Sun is so powerful so much bigger than us that it is a terrifying subject Yet though we depend on it we take it for granted Amazingly the first book of its kind CHASING THE SUN is a cultural and scientific history of our relationship with the star that gives us life Richard Cohen applying the same mix of wide ranging reference and

intimate detail that won outstanding reviews for *By the Sword* travels from the ancient Greek astronomers to modern day solar scientists from Stonehenge to Antarctica site of the solar eclipse of 2003 when penguins were said to sing Mexico s Aztecs to the Norwegian city of Tromsø where for two months of the year there is no Sun at all He introduces us to the crucial sunspot cycle in modern economics the religious dances of Indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and Galileo recording his discoveries in code for fear of persecution And throughout there is the rich Sun literature from the writings of Homer through Dante and Nietzsche to Keats Shelley and beyond Blindingly impressive and hugely readable this is a tour de force of narrative non fiction

Sullivan, 2014-10-06 On May 17 1899 Patrick Sullivan married Mary Jane Carroll in Yonkers New York despite the objections of Patrick's family who believed he was marrying below his class But their dreams of living a long life together came to an end when Patrick died unexpectedly on August 13 1911 leaving Mary destitute with four children and a fifth who was born three weeks after Patrick's death Shunned by Patrick's family Mary and her children fought off starvation in a tenement in Yonkers for several months Then one evening she was visited by her two brothers John and Barney who insisted her entire family move into and share their meager home at Six Moquette Row There the children were raised by their grandmother mother and their two loving uncles A story for the ages Six Moquette Row by author John F Sullivan narrates the true story of how one family's love and a shared devotion to one another turned what would have inevitably been a horrific tragedy into an incredible success story that now totals more than eighty descendants *Asian and Pacific Islander Americans in Congress, 1900-2017* Albin Kowalewski, 2017 *Enemy Images in American History* Ragnhild Fiebig-von Hase, Ursula Lehmkuhl, 1998-01-01 It seems to be a tenet of the human condition to perceive others as different and potentially hostile In nearly all societies stereotypes are developed to stigmatize suspected enemies within and without The American case is particularly interesting in this respect because American society consists of nothing but others to be open to others and welcome those who are different is one of the basic tenets of the country However this principle often conflicts with the need to integrate all these strangers into a homogeneous governable society which causes the formation of hostile stereotypes of certain ethnic groups that do not fit in The authors in this volume look at the development of these enemy images which form a fairly consistent pattern from the period of the American Revolution to the post World War II era In doing so they focus on the question of to what extent these enemy images influence the formulation and outcome of foreign domestic and immigration policies **Architecture in Salem** Bryant Franklin Tolles, Carolyn K.
