A Heart of Wisdom Cynthia Chambers, 2012 Personal accounts whether taking the form of memoirs essays or even poetry all come under the broad genre which can be described as life writing In this anthology the editors who are professors of education at three Canadian universities gather 47 pieces that explore key moments of individuals in learning or teaching others Striking color photographs occasionally appear most often in a series of poems by Ahava Shira Other more formal pieces on the other hand actually provide references What appears to be an automatically generated index appears at the close Annotation 2012 Book News Inc Portland OR booknews com

Postformal Education Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational

educational theories designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy

Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past

Gidley's challenge is to co evolve a radically new education All who seek to play a part must read this book
