#### A History Of The Nature Conservancy Of Canada:

A History of the Nature Conservancy of Canada Bill Freedman, 2013-03-28 The Nature Conservancy of Canada is the leading non governmental land conservation organization a private not for profit organization that partners with corporate and individual landowners to protect natural lands The NCC s work is supported by about 40 000 active donors and manages 2 2 million acres of ecologically important land nationwide The NCC is by all accounts a rare good news environmental story

An Environmental History of Canada Laurel Sefton MacDowell, 2012-07-31 Traces how Canada's colonial and national development contributed to modern environmental problems such as urban sprawl the collapse of fisheries and climate change Includes over 200 photographs maps figures and sidebar discussions on key figures concepts and cases Offers concise definitions of environmental concepts Ties Canadian history to issues relevant to contemporary society Introduces students to a new dynamic approach to the past Throughout history most people have associated northern North America with wilderness with abundant fish and game snow capped mountains and endless forest and prairie Canada's contemporary picture gallery however contains more disturbing images deforested mountains empty fisheries and melting ice caps Adopting both a chronological and thematic approach Laurel MacDowell examines human interactions with the land and the origins of our current environmental crisis from first peoples to the Kyoto Protocol This richly illustrated exploration of the past from an environmental perspective will change the way Canadians and others around the world think about and look at Canada **The History of Geoconservation** Cynthia V. Burek, Colin D. Prosser, 2008 This book is the first to describe the history of geoconservation It draws on experience from the UK Europe and further afield to explore topics including what is geoconservation where when and how did it start who was responsible and how has it differed across the world Geological and geomorphological features processes sites and specimens provide a resource of immense scientific and educational importance They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations Mankind's activities including contributing to enhanced climate change pose many threats to this resource the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development Geoconservation is an established and growing activity across the world with more participants and a greater profile than ever before This volume highlights a history of challenges set backs successes and visionary individuals and provides a sound basis for taking geoconservation into the future The Bar U & Canadian Ranching History S. M. Evans, 2004 For much of its 130 year history the Bar U Ranch can claim to have been one of the most famous ranches in Canada Its reputation is firmly based on the historical role that the ranch has played its size and longevity and its association with some of the remarkable people who have helped develop the cattle business and build the Canadian West The long history of the ranch allows the evolution of the cattle business to be traced and can be seen in three distinct historical periods based on the eras of the individuals who owned and managed the ranch These colourful figures

beginning with Fred Stimson then George Lane and finally Pat Burns have left an indelible mark on the Bar U as well as Canadian ranching history The Bar U and Canadian Ranching History is a fascinating story that integrates the history of ranching in Alberta with larger issues of ranch historiography in the American and Canadian West and contributes greatly to the overall understanding of ranching history Conservation Directory 2000 National Wildlife Federation, 1999 The Lyons Press is proud to present the forty fifth annual edition of the National Wildlife Federation's Conservation Directory of U S and international organizations and agencies working to protect the environment the most vital resource of its kind Included are members of the United States Congress government agencies citizens groups educational institutions databases services periodicals and other directories federally protected conservation areas indexes and more This annual directory is essential for colleges and universities libraries environmental activists students outdoor writers science editors natural resource agencies those seeking employment in the field of conservation researchers and all individuals interested in wildlife and ecology Nature Conservancy, 2003 Conservation Directory ,1970 Routledge Library Editions: Environmental Policy Various, 2021-06-23 The 11 volumes in this set originally published between 1982 and 1995 draw together research by leading academics in the area of environmental policy and provides a rigorous examination of related key issues The volumes examine international policy impact assessment and future environmental planning This set will be of particular interest to students of Environmental Studies Protected Places Gerald Killan, 1993-07-25 Since the founding of Algonquin Provincial Park in 1893 Ontario has developed a parks system that is held in the highest regard Today some 260 parks span the province Protected Places is a comprehensive account of the attitudes and actions that have shaped provincial parks policy over the century notably those of early conservationists and more recently of environmentalists aboriginal peoples vacationers of every description naturalists scientists loggers miners concession operators the administrators with the responsibility to plan develop and manage the parks and the politicians who made the ultimate decisions on policy matters Author Gerald Killan's analysis cuts across the disciplines of history geography political science environmental studies and the earth and life sciences The book will be of compelling interest to readers from all these backgrounds as well as the park visitor Protected Places is being published in 1993 as part of the celebration of the Centennial of Ontario's provincial parks The Nature Conservancy Magazine ,2003 Status and Trends of the Nations's Biological Resources Catherine E.

Landscapes Tony Prato, Tony Professor Prato, Dan Professor Fagre, 2010-09-30 Prato and Fagre offer the first systematic multi

disciplinary assessment of the challenges involved in managing the Crown of the Continent Ecosystem CCE an area of the

Rocky Mountains that includes northwestern Montana southwestern Alberta and southeastern British Columbia The

spectacular landscapes extensive recreational options and broad employment opportunities of the CCE have made it one of

the fastest growing regions in the United States and Canada and have lead to a shift in its economic base from extractive resources to service oriented recreation and tourism industries In the process however the amenities and attributes that draw people to this New West are under threat Pastoral scenes are disappearing as agricultural lands and other open spaces are converted to residential uses biodiversity is endangered by the fragmentation of fish and wildlife habitats and many areas are experiencing a decline in air and water quality Sustaining Rocky Mountain Landscapes provides a scientific basis for communities to develop policies for managing the growth and economic transformation of the CCE without sacrificing the quality of life and environment for which the land is renowned The book begins with a natural and economic history of the CCE It follows with an assessment of current physical and biological conditions in the CCE The contributors then explore how social economic demographic and environmental forces are transforming ecosystem structure and function They consider ecosystem change in response to changing patterns of land use pollution and drought the increasing risk of wildfire to wildlife and to human life and property and the implications of global climate change on the CCE A final policy focused section of the book looks at transboundary issues in ecosystem management and evaluates the potential of community based and adaptive approaches in ecosystem management **History of Palaeobotany** A. J. Bowden, Cynthia V. Burek, R. Wilding, 2005 Often regarded as the Cinderella of palaeontological studies palaeobotany has a history that contains some fascinating insights into scientific endeavour especially by palaeontologists who were perusing a personal interest rather than a career The problems of maintaining research facilities in universities especially in the modern era are described and reveal a noticeable absence of a national UK strategy to preserve centres of excellence in an avowedly specialist area Accounts of some of the pioneers demonstrate the importance of collaboration between taxonomists and illustrators The importance of palaeobotany in the rise of geoconservation is outlined as well as the significant and influential role of women in the discipline Although this volume has a predominantly UK focus two very interesting studies outline the history of palaeobotanical work in Argentina and China Tourism Support Services Patrick Kalasa Kalifungwa,2025-06-02 Tourism can thrive anywhere in the World on Land on sea and in the Air Certain parameters have to exist to facilitate its establishment and growth We have tried to explore various aspects that require being in place to support tourism development and growth The development of technology and transport infrastructure such as jumbo jets low cost airlines and more accessible airports have made many types of tourism to be more affordable Airplanes facilitate tourism mobility and receipts The more planes you land at an airport the more visitors you receive The ultimate goal of tourism promotion and marketing is an increase in visitors and investments The tourism Industry is unlike any other industries because Instead of a physical product you are selling a place and all the things it has to offer services You are competing with the entire world every time you promote tourism in a given destination and this high level of competition demands a creative and unique approach The variability among living organisms from all sources including inter alia terrestrial marine and other aquatic

ecosystems and ecological complexes support tourism development Natural environment or wilderness wild animals rocks birds forest and in general those things that have not been substantially altered by human intervention support tourism activities Therefore support services have to complement the sustenance of tourism at various levels **Conservation of Tropical Rainforests** Brian Joseph McFarland,2017-11-14 This book critically engages with how the conservation of tropical rainforests is financed Beginning with the context of tropical deforestation alongside an overview of tropical ecology global environmental policy and finance the book reviews several conservation financing instruments These include ecotourism and private reserves debt for nature swaps and government domestic budgetary expenditures for state and national parks Tropical deforestation and forest degradation are serious global environmental issues contributing to global climate change species extinction and threatening the livelihoods of forest dependent communities Yet many leading companies individuals and governments are making a positive impact on tropical forest conservation to mitigate greenhouse gas emissions through the use of conservation finance Conservation of Tropical Rainforests tells the history of international conservation finance and provides a variety of options for individuals businesses and governments to support conservation financing projects
