The Far Edges of the Known World Owen Rees, 2025-09-30 A revisionist history of the ancient world that shifts our focus from Athens and Rome to the long ignored societies on the borders When Ovid was exiled from Rome to a border town on the Black Sea he despaired at his bleak and barbarous new surroundings Like many Greeks and Romans Ovid thought the outer reaches of his world was where civilization ceased to exist Our own fascination with the Greek and Roman world has for centuries followed this perspective shrouding cultures at the far reaches of their influence in myth But what was it like to live on the edges of these empires on the boundaries of the known world In *The Far Edges of the Known World* ancient historian Owen Rees draws on archaeological excavations to reveal these so called borders as thriving multicultural spaces This is where the boundaries of civilized and barbarian began to dissipate where traditional rules didn't always apply where different cultures intermarried and where nomadic tribes built their own cities Transporting readers through historical spheres of influence Rees journeys from the sandy caravan routes of Morocco to the freezing winters of the northern Black Sea from the Red River valley of Vietnam to the rain lashed forts south of Hadrian's Wall Beyond well remembered figures like Cleopatra and Caesar Rees introduces us to the everyday people who called the borderlands home We meet an enterprising sex worker in Egypt's Naucratis gambling soldiers at Hadrian's Wall in England a Greco Buddhist monk hailing from the Ganges and more As Rees shows exchanges of trends ideas even religious practices were happening all over the world *The Far Edges of the Known World* offers us a vibrant new lens to see and understand the ancient world

Mapping an Atlantic World, circa 1500 Alida C. Metcalf, 2020-10-13 How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus's voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus's exploration In *Mapping an Atlantic World circa 1500* Alida C Metcalf argues that the earliest surviving

maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then repeated on map after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps Understanding World Regional Geography Erin H. The Journey of Maps and Images on the Silk Road Philippe Forêt, Andreas Kaplony, 2008 This book covers new ground on the diffusion and transmission of geographical knowledge that occurred at critical junctures in the long history of the Silk Road Much of twentieth century scholarship on the Silk Road examined the ancient archaeological objects and medieval historical records found within each cultural area while the consequences of long distance interaction across Eurasia remained poorly studied Here ample attention is given to the journeys that notions and objects undertook to transmit

spatial values to other civilizations In retracing the steps of four major circuits right across the many civilizations that shared the Silk Road The Journey of Maps and Images on the Silk Road traces the ways in which maps and images surmounted spatial historical and cultural divisions Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c ,1830
