Injury and Causation in Trade Remedy Law James J. Nedumpara, 2016-11-25 This book addresses injury and causation issues in the

context of antidumping countervailing duty CVD and safeguard investigations that are covered under the WTO The book traces the origin and the negotiating history of injury and causation in trade remedy instruments and examines how this requirement evolved in the United States and more specifically in the GATT as part of the Kennedy Code the Tokyo Codes and later the Uruguay Round negotiating texts The book demonstrates that terms such as principal cause substantial cause and a cause in and of itself are not necessarily warranted in such instruments In the light of the experiences of key users of trade remedy instruments and the WTO Doha Round Rules negotiations the book argues that causation determination does not require mathematical precision Econometric or quantitative tools may be suggested but such tools need not undermine the policy laden nature of trade remedy instruments Accordingly the book suggests the use of weak necessity and strong sufficiency test as a potentially viable causative framework with regard to injury and causation in trade remedies

some critical challenges **Encyclopedia Of The Global Economy A Guide For Students And Researchers** David E. O'connor, 2006 Guide to International Anti-Dumping Practice Derk Bienen, Gustav Brink, 2013-09-01 This book is the first to bring together the actual practices and procedures in all the major users of anti dumping. The countries surveyed include all the so called traditional users: Australia, Canada, the EU, New Zealand, South Africa and the United States, as well as the leading new users: Argentina, Brazil, China, India, Korea, Mexico and Turkey. The book provides not only an overview of each of the systems considered but also a detailed reference to the way different jurisdictions have handled specific issues. In addition, the structure for each chapter is virtually identical, allowing for a ready comparative analysis of various topics. These topics include the following: applicable legislation, regulations, prescribed guidelines and procedures, decision making process and time line, the likelihood of an investigation leading to the imposition of measures, statistics 1995-2011, with details of actual investigations and duties imposed, threshold of injury and calculation of non-injurious price, establishment of causal link, verification reports, hearings, access to information and other procedural issues, reviews and refunds, and anti-circumvention measures. An introductory chapter provides a comparative statistical analysis of the use of anti dumping by the thirteen countries, highlighting key features of anti dumping systems in a comparative way. The introduction also assesses the important impacts of China's accession to the WTO in 2001 and of the economic and financial crisis of 2008-2009, discusses the treatment of non-market economies and notes emerging tendencies in anti dumping reform. This is an invaluable work on a key area in trade and competition law, written by a team of well-known experts. With its comprehensive and practical format, the book will be of great interest to practitioners dealing with anti dumping cases, including trade law practitioners who may have to defend anti dumping cases in different jurisdictions, attorneys in international trade law and competition law, government officials, academics and researchers.
