The Vimy Trap Ian McKay, Jamie Swift, 2017-03-16 The story of the bloody 1917 Battle of Vimy Ridge is according to many of today's tellings a heroic founding moment for Canada This noble birth of a nation narrative is regularly applied to the Great War in general Yet this mythical tale is rather new Vimyism today's official story of glorious martial patriotism contrasts sharply with the complex ways in which veterans artists clerics and even politicians who had supported the war interpreted its meaning over the decades Was the Great War a futile imperial debacle A proud nation building milestone Contending Great War memories have helped to shape how later wars were imagined The Vimy Trap provides a powerful probe of commemoration cultures This subtle fast paced work of public history combining scholarly insight with sharp eyed journalism and based on primary sources and school textbooks battlefield visits and war art explains both how and why peace and war remain contested terrain in ever changing landscapes of Canadian memory

Special Operations and National Security Ben Gans, 2024-11-08 This book focuses on strategic special operations and how these have led to the achievement of major foreign policy goals which is illustrated by six case studies The study specifically focuses on the alignment of the policies strategies and tactics that dominated these operations providing a fresh perspective Theoretically the work underscores the continued relevance of relative superiority as the dominant theory in the field Importantly it aligns the potential ways of achieving and sustaining relative superiority with the ability to conduct contemporary special operations across multiple domains thereby generating cross dimensional effects In terms of methodology the book includes a description and analysis of six distinct case studies in special operations ranging from short term surgical strikes to sustained special warfare campaigns and spanning multiple geographic regions including in Iran Lebanon Syria Ukraine and the South China Sea From that perspective relative superiority theory is extrapolated to explain how this critical condition can be achieved and sustained during protracted special operations The unique value of this research is underscored by the author's collection of exclusive primary source data on the operations in the respective countries The book's conclusions explain how the personnel involved fulfill the strategic promise of special operations given their position within the larger framework of foreign policy This book will be of much interest to students of special operations military and strategic studies defense studies and security studies in general

Olsen, Martin van Creveld, 2011 Broadly defined as the grey area between strategy and tactics operational art spans the theory and practice of planning and conducting campaigns and major operations aimed at accomplishing strategic and operational objectives in a given theatre of operations An intermediate link between strategy and tactics has always existed but a distinct concept that encompasses a systematic and deliberate plan of campaign for major operations is a mere two hundred years old Based on country specific case studies this book describes how the concepts that underpin operational art originated how they received practical expression in various campaigns and how they developed over time The point of departure is the campaigns of the God of War Napoleon Bonaparte The book then proceeds with chapters on the evolution of operational art in Prussia Germany the Soviet Union Russia the United Kingdom United States Israel and China The final chapter deals with the future of operational art in irregular warfare Theory is critical to refining and improving existing methods of applying operational warfare and its importance cannot be overstated however to be useful theory and its accompanying vocabulary must be combined with a proper examination of historical trends and practical experience The present volume attempts to achieve that combination This book is a project of the Oxford Leverhulme Programme on the
