A History Of The Western Educational Experience:

A History of the Western Educational Experience Gerald Lee Gutek, 1972 *A History of the Western Educational Experience* Gerald L. Gutek, 2022-02-15 This comprehensive volume identifies and analyzes the significant ideas and institutions that shaped the Western educational heritage. The author examines how worldwide events have impacted education in Europe, North America, and beyond. The third edition incorporates fresh material about the ancient world, European exploration and colonization of North America and India, as well as updated chapters on education in the United Kingdom, France, Germany, and Russia. This edition has an expanded treatment of Carl Jung, a new section on Margaret Naumburg and her Walden School, and enhanced analysis of many other theorists. It concludes with broadened coverage of nineteenth, twentieth, and twenty-first century American education, including many educators new to the third edition. Each chapter contains a new feature: Reflection, Discussion, and Research. From Plato and Aristotle to John Dewey, leading educators raised perennial concepts about education and truth, meaning, and value that remain relevant today. In the progression from antiquity to the present, some issues are marked by change and others by continuity, all of which are important to consider, discuss, and research further.

A Memoir of an Educational Biographer Gerald L. Gutek, 2024-09-01 In his interdisciplinary memoir, Gerald Gutek applies history and philosophy of education to educational biography. The author was guided by his focusing goals of exploring his path to becoming an educational biographer and working generalizations with his colleagues in the field. Gutek's narrative begins with the author's childhood experiences that inclined him to a career in education, followed by chapters on his doctoral program in the College of Education at the University of Illinois in Champaign-Urbana, his teaching of history and philosophy and education in the School of Education at Loyola University Chicago, his research and writing of biographies of Johann Heinrich Pestalozzi and Joseph Neef, and his textbook *Historical and Philosophical Foundations of Education*, a Biographical Introduction, and issues and strategies in writing about Maria

Montessori Throughout the book Gutek analyzes concepts and applications he developed as an educational biographer such as parallel biographies slice of life writing reconsidering overlooked and understudied educators and the role of place and space in telling life stories ENDORSEMENTS Readers both new to educational biography or familiar with the discipline will find a valuable account of the author's long and varied career as a biographer From his childhood memory of listening to neighbors' stories in his grandfather's grocery store to encounters with the important teachers in his life Gutek brings his own story to life As he recounts the influences on his personal intellectual history and the processes of his research and writing readers gain valuable insights into the methods of an experienced educational biographer Larry Prochner University of Alberta For fifty years Gerald Gutek has been and remains one of the seminal and leading voices in the field of educational biography thus it only makes sense for him to create something new an intellectual memoir From his work on Counts in 1970 to his work on Montessori 2016 and her acolytes in the US 2020 Gutek has reliably bridged the worlds of educational history educational biography and philosophical foundations of education this work cements his legacy Gutek skillfully interweaves personal and family history with movements in educational history both formal and informal then explains how these impacted his thinking and writing Throughout this eminently readable memoir Gutek also includes political and historical context without engaging in divisiveness Scholars of life writing should give this a close reading as Gutek sprinkles nuggets of methodological brilliance throughout the manuscript Junior scholars would do well to read Gutek's more substantive sections on the methods used to write each of his books it is the academic equivalent of Master Class in textual form Ed Janak University of Toledo

Education in World History Mark S. Johnson, Peter N. Stearns, 2022-09-01 Education in World History shows how broad currents in transnational history have interacted with trends in educational organization and teaching practices over time From antiquity and early classical societies to present day this book highlights the ways in which changes in religious and intellectual life and economic patterns in key world regions have generated developments in education Since the postclassical period cross cultural connections have also influenced educational change In more recent times transnational dialogues and mobility have played a vital role in shaping educational patterns Ranging through South and East Asia Africa Europe and the Americas the book also considers how the impact of modern forces such as industrialization and nationalism have transformed education in fundamental ways Throughout the volume Mark S Johnson and Peter N Stearns emphasize the tensions between elite and state educational interests and more diverse popular demands for access and often for more innovative pedagogy Suitable for introductory world history and history of education courses this lively overview reconsiders the history of education from the perspective of world and comparative history **Jews, Judaism, and Success** Robert Eisen, 2023-06-23 In Jews Judaism and Success Robert Eisen attempts to solve a long standing mystery that has fascinated many How did Jews become such a remarkably successful minority in the modern Western world Eisen argues that Jews achieved such success because they were unusually well prepared for it by their

religion in particular Rabbinic Judaism or the Judaism of the rabbis Rooted in the Talmud this form of Judaism instilled in Jews key values that paved the way for success in modern Western society autonomy freedom of thought worldliness and education The book carefully analyses the evolution of these four values over the past two thousand years in order to demonstrate that they had a longer and richer history in Jewish culture than in Western culture The book thus disputes the common assumption that Rabbinic Judaism was always an obstacle to Jews becoming modernized It demonstrates that while modern Jews rejected aspects of Rabbinic Judaism they also retained some of its values and these values in particular led to Jewish success Written for a broad range of readers Jews Judaism and Success provides unique insights on the meaning of success and how it is achieved in the modern world

Christian Education: Its History and Philosophy Kenneth O. Gangel,Warren S. Benson,2002-03-05 A history of Christian education must not be confused with a record of the achievements of the Sunday School The discipline has advanced well beyond that stage and today s sophisticated students fully understand that no proper concept of the history and philosophy of Christian education can be gained without seeing all the ramifications implications and influences that have affected it from pre Christian times to the present So Drs Gangel and Benson have written this book a historical flow of philosophical thought from a Christian point of view Its focus is cultural biographical discussing each philosophy in its particular socio historical setting and giving special attention to significant individuals The format is chronological beginning with education in biblical times working upward through history to arrive at the present and beyond raising questions and issues for the future

Isocrates James R. Muir,2022-06-02 Isocrates is one of the most remarkable and influential figures in the history of human thought The influence of his ideas in the history of historical writing rhetoric the visual arts music religion and theology political science philosophy and above all educational philosophy and practice in Europe Australia North America North Africa and the Middle East are well established and widely known This book argues careful study of the educational philosophy of Isocrates and its legacy can contribute to an improved understanding of the historiography of educational thought his distinctive normative methodology in both political and educational philosophy and his arguments about the primary importance of the virtues of self knowledge and realistic self appraisal for educational philosophers and practitioners At a time when educational philosophy has an increasingly precarious academic existence and educationists are actively seeking new historiographical and methodological approaches to the philosophical study of education there is much to be gained by recovering and reevaluating the historiography and normative methodology of Isocrates and the role they play in educational discourse and practice today

Outdoor Learning: Past and Present Rosaleen Joyce,2012-02-16

The book breaks new ground by placing outdoor learning in a theoretical historical and social context of changing understandings of children childhood and the use of the outdoors The books approach is based on the premise that ideas phase in and out of use depending on social and political contexts This perspective will help people to think about how present day attitudes regarding outdoor learning came to be where they came from and to question their newness The author argues that outdoor learning needs to be looked at in a historical context so that you can understand the contribution of previous educational thinkers on today s views and practices The main historical thinkers considered include Comenius Pestalozzi Froebel and Margaret McMillan as well as the views of more modern contributors and the Forest Schools in the UK Joyce makes it possible to look more critically at today s approaches and influences on outdoor learning She considers how children are regarded today within these approaches and whether these constructs are in the children s best interests Key features of this book include A reflective approach to practice Effective training for practitioners in their use of the outdoors recognising the different approaches required from those used in the indoor classroom This book is essential reading for all early years practitioners
