Ballistics 18th International Symposium William G. Reinecke, 1999-11-10 *Material Properties under Intensive Dynamic Loading* Mikhail V. Zhernokletov, B. L. Glushak, 2007-07-16 Understanding the physical and thermomechanical response of materials subjected to intensive dynamic loading is a challenge of great significance in engineering today This volume assumes the task of gathering both experimental and diagnostic methods in one place since not much information has been previously disseminated in the scientific literature **34th Aerospace Sciences Meeting & Exhibit**, 1996 *Shock Wave Science and Technology Reference Library, Vol. 5* Blaine Asay, 2009-12-16 Los Alamos National Laboratory is an incredible place It was conceived and born amidst the most desperate of circumstances It attracted some of the most brilliant minds the most innovative entrepreneurs and the most active tinkerers of that generation Out of that milieu emerged physics and engineering that beforehand was either unimagined or thought to be fantasy One of the elders essentially invented during those years was the science of precision high explosives Before 1942 explosives were used in munitions and commercial pursuits that demanded proper chemistry and con nement for the necessary effect but little else The needs and requirements of the Manhattan project were of a much more precise and specific nature Spatial and temporal specifications were reduced from centimeters and milliseconds to micrometers and nanoseconds New theory and computational tools were required along with a raft of new experimental techniques and novel ways of interpreting the results Over the next 40 years the emphasis was on higher energy in smaller packages more precise initiation schemes better and safer formulations and greater accuracy in forecasting performance Researchers from many institutions began working in the emerging and expanding field In the midst of all of the work and progress in precision initiation and scientific study in the early 1960s papers began to appear detailing the first quantitative studies of the transition from deflagration to detonation DDT first in cast then in pressed explosives and finally in propellants **The 9th International Conference on Advances in Construction**
