

About this manual

The purpose

The purpose of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done, even if you choose to have it done by a dealer service department or a repair shop. It provides information and procedures for routine maintenance and servicing, what it offers (diagnosis and repair) procedures to follow when trouble occurs.

We hope you use this manual to handle the work yourself. For many smaller jobs, doing it yourself may be easier than arranging an appointment to get the vehicle into a shop and making the trip to have it and park it up. More importantly, a lot of money can be saved by avoiding the expense the shop must pass on to you to cover the labor and overhead costs. An added benefit is the sense of satisfaction and accomplishment that you feel after doing the job yourself.

Using the manual

This manual is divided into Chapters. Each Chapter is divided into numbered Sections, which are headed by bold-type between horizontal

lines. Each Section consists of consecutively numbered paragraphs.

At the beginning of each numbered Section you will be referred to any illustrations which apply to the procedure in that Section. The reference numbers used in illustration captions pinpoint the pertinent Section and the Step within that Section. That is, Illustration 5.2 means the illustration refers to Section 5 and Step (or paragraph) 2 within that Section.

Procedures, most described in the text, are not normally repeated. When it's necessary to refer to another Chapter, the reference will be given as Chapter and Section number. Cross references given without use of the word "Chapter" apply to Sections and/or paragraphs in the same Chapter. For example, "See Section 6" means in the same Chapter.

References to the left or right side of the vehicle assume you are sitting in the driver's seat, facing forward.

Even though we have prepared this manual with extreme care, neither the publisher nor the author can accept responsibility for any errors in, or omissions from, the information given.

NOTE

A Note provides information necessary to properly complete a procedure or information which will make the procedure easier to understand.

CAUTION

A Caution provides a special procedure or special steps which must be taken while completing the procedure where the Caution is found. Not heeding a Caution can result in damage to the assembly being worked on.

WARNING

A Warning provides a special procedure or special steps which must be taken while completing the procedure where the Warning is found. Not heeding a Warning can result in personal injury.

Introduction to the Ford Mustang

The Ford Mustang is available in two-door sport coupe or convertible body styles and has a conventional front-engine-rear-wheel drive layout.

The available engines on the models covered by this manual are: a 3.0L V6, a Single-Overhead Cam two-valve per cylinder (SOHC) V6 4.0L V6, a Dual-Overhead Cam four-valve per cylinder (DOHC) V6 4.6L V8 or a dual-valve 5.0L V8 engine. All models use an electronically controlled multi-point fuel injection system. Later models are equipped with On-Board Diagnostic (second generation (OBD II)) computerized engine management system. OBD II monitors engine and emissions system operation for malfunctions. The check engine light on the instrument panel will illuminate if any computer malfunction occurs.

Power from the engine is transferred through either a five-speed manual or four-speed automatic transmission and a driveshaft to the

differential which is mounted to the solid rear axle assembly. Axles inside the assembly carry power from the differential to the rear wheels.

Suspension is independent on the front, utilizing struts and lower control arms to locate the knuckle assembly at each wheel. Coil springs are mounted between the lower control arm and the frame. The rear suspension features coil springs and shock absorbers.

The steering gear is a power assisted rack and pinion type that is mounted to the front of the engine compartment with rubber insulation.

The brakes are disc at the front and the rear with vacuum assist on standard equipment. Models equipped with a 3.0L DOHC V6 engine offer hydro-boost (power assisted) brakes as standard equipment. Anti-lock Braking Systems (ABS) are optional on all models.

great way to be instantly successful in the racing arena When Enzo Ferrari realized that Ford would not give him complete control of the racing program he backed out of the deal late in the process Ford had spent millions in vetting and audits which then set in motion a vengeful response against Ferrari The result was the unthinkable Ford beat Ferrari at Le Mans Ford wanted to become competitive quickly but it did not have the race history or resources in house To remedy the situation
