Conscious decisions are underpinned by a guiding subconscious that can be understood only by analysis. Taken from one of his most important works, *The Psychopathology of Everyday Life*, published in a new translation in Penguin Modern Classics, this volume explores why we forget, how we remember, and why our memories can sometimes prove deceptive. *Writing Emotions* Ingeborg Jandl, Susanne Knaller, Sabine Schönfellner, Gudrun Tockner, 2018-07-15

After a long period of neglect, emotions have become an important topic within literary studies. This collection of essays stresses the complex link between aesthetic and non-aesthetic emotional components and discusses emotional patterns by focusing on the practice of writing as well as on the impact of such patterns on receptive processes. Readers interested in the topic will be presented with a concept of aesthetic emotions as formative both within the writing and the reading process. Essays ranging in focus from the beginning of modern drama to digital formats and theoretical questions examine examples from English, German, French, Russian, and American literature. Contributors include Angela Locatelli, Vera Nünning, and Gesine Lenore Schiewer. *The Snobs* Muriel Spark, 2005

The novels of David Foster Wallace, Dave Eggers, and Jonathan Safran Foer are increasingly regarded as representing a new trend: an aesthetic sea change in contemporary American literature. Postmodernism and New Sincerity are just two of the labels that have been attached to this trend. But what do these labels mean? What characterizes and connects these novels? Den Dulk shows that the connection between these works lies in their shared philosophical dimension. On the one hand, they portray excessive self-reflection and endless irony as the two main problems of contemporary Western life. On the other hand, the novels embody an attempt to overcome these problems: sincerity, reality, commitment, and community are portrayed as the virtues needed to achieve a meaningful life. This shared philosophical dimension is analyzed by viewing the novels in light of the existentialist philosophies of Søren Kierkegaard, Jean-Paul Sartre, Ludwig Wittgenstein, and Albert Camus.
