Asias New Multilateralism Cooperation Competition And The Search For Community:

Asia's New Multilateralism Michael J. Green, Bates Gill, 2009 Traditionally stability in Asia has relied on America's bilateral alliances with Japan Australia and the Republic of Korea Yet in recent years emergent and more active multilateral forums such as the Six Party Talks on North Korea and the East Asia Summit have taken precedence engendering both cooperation and competition while reflecting the local concerns of the region Some are concerned that this process is moving toward less inclusive bloc based talking shops and that the future direction and success of these arrangements along with their implications for global and regional security and prosperity remain unclear The fifteen contributors to this volume all leading scholars in the field provide national perspectives on regional institutional architecture and their functional challenges They illuminate areas of cooperation that will move the region toward substantive collaboration convergence of norms and strengthened domestic institutions They also highlight the degree to which institution building in Asia a region composed of liberal democracies authoritarian regimes and anachronistic dictatorships has become an arena for competition among major powers and conflicting norms and assess the future shape of Asian security architecture *Routledge*

Handbook of Environment and Society in Asia Paul G. Harris, Graeme Lang, 2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia In recent decades rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution solid and hazardous wastes deforestation depletion of natural resources and extinction of native species This handbook provides a comprehensive survey of the cultural social and policy contexts of environmental change across East Asia The team of international experts critically examine a wide range of environmental problems related to energy climate change air land water fisheries forests and wildlife The editors conclude that with nearly half of the human population of the planet and several rapidly growing economies most notably China Asian societies will determine much of the future of human impacts on the regional and global environments As climate change related threats to society increase the book strongly argues for increased environmental consciousness and action in Asian societies This handbook is a very valuable companion for students scholars policy makers and researchers working on environmental issues in Asia

Lantis, 2016-03-22 This book shows how one of the most powerful tools of security studies strategic culture illuminates the origins and implications of the Asia Pacific region's difficult issues from the rise of China and the American pivot to the shifting calculations of many other actors Strategic culture sometimes challenges and always enriches prevailing neo realist presumptions about the region It provides a bridge between material and ideational explanations of state behavior and helps capture the tension between neoclassical realist and constructivist approaches The case studies in this book survey the role of strategic culture in the behaviors of Australia China Japan the Philippines South Korea and the United States They show the contrast between structural expectations and cultural predispositions as realist geopolitical security threats and opportunities interact with domestic elite and popular interpretation of historical narratives and distinctive political military cultures to influence security policies The concluding chapter devotes special attention to methodological issues at the heart of strategic cultural studies as well as how culture may impact the potential for future conflict or cooperation in the region The result is a body of work that helps deepen our understanding of strategic cultures in the Asia Pacific in comparative perspective and enrich security studies This book was published as a special issue of Contemporary Security Policy

Strategic Partnerships in Asia Vidya Nadkarni, 2010-01-21 Addresses the strategies pursued by potential challengers to American global preeminence through an examination of the nature and implications of the increasing interaction among

three secondary powers China Russia and India **The Economy-Security Nexus in Northeast Asia** T.J.

Pempel,2013-01-04 The dynamics of Northeast Asia have traditionally been considered primarily in military and hard security terms or alternatively along their economic dimensions This book argues that relations among the states of Northeast Asia are far more comprehensible when the mutually shaping interactions between economics and security are considered simultaneously It examines these interactions and some of the key empirical questions they pose the answers to which have important lessons for international relations beyond Northeast Asia Contributors to this volume analyze how the states of the region define their security and how bilateral relations in hard security issues and economic linkages play out among Japan China and the two Koreas Further the chapters interrogate how different patterns of techno nationalist development affect regional security ties and the extent to which closer economic connections enhance or detract from a nation s self perceived security The book concludes by discussing scenarios for the future and the conditions that will shape relations between economics and security in the region This book will be welcomed by students and scholars of Asian politics Asian economics security studies and political economy Routledge Handbook of Asian Regionalism Mark Beeson,Richard

Stubbs,2012-03-15 The Routledge Handbook of Asian Regionalism is a definitive introduction to and analysis of the development of regionalism in Asia including coverage of East Asia Southeast Asia and South Asia The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world Significantly this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region economic issues political issues strategic issues regional organizations As such the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events This book will be an indispensable resource for students and scholars of Asian politics international relations and regionalism *Changing Power Relations in Northeast Asia* Marie

Soderberg,2011-03-07 The aim of this book is to analyse the Japan South Korean relationship from various angles such as politics security economics culture and immigration issues and how the relationship is affected by the changing power relations in Northeast Asia **The United States and China** Narayani Basu,2015-10-05 With its long history of internal

divisiveness and its intersecting cultural and linguistic cleavages East Asia is undoubtedly a complex area However the idea of East Asia as a regional entity is one that is relatively recent a concept that gained momentum after the financial crisis that rocked the region in the 1990s In recent years East Asia has become considerably more interdependent connected and cohesive This increased cohesiveness has been driven by a dense network of trade and investments technology sharing and communication among many other variables and has been reflected in the increasing institutionalisation of regional mechanisms like the ASEAN Regionalism is not however entirely about economic interdependence In today s day and age it

means not only overarching social networks and a regional identity but also strategic thinking that recognises common security interests This book takes into account the regional discourses of two of East Asia s biggest players the United States and China While the former has been a power to reckon with albeit externally deeply entrenched in the region since the end of the Second World War the rise of China in the 21st century and its emergence as the largest power in East Asia has brought a new perspective to East Asian regionalism In 2010 the United States began reasserting itself in East Asia bringing into sharp focus the ideological differences between itself and China as each vied to shape the architecture of East Asian security There is no doubt that heightened American interest comes at a time when China s own views of regionalism have become noticeably less cooperative While balance of power politics is one way to look at the geopolitical tug of war in East Asia there are questions that have not yet been answered How do the two countries look at a region that is so important for them How has that perception influenced their foreign policy within the same arena More importantly how do they define East Asia This book studies American and Chinese regional discourses from the end of the Cold War to the present day in order to highlight the rationale behind the natural balance of power politics between an established power and a rising one and its subsequent effects on security regionalism in East Asia

Institutionalizing East Asia Alice D. Ba, Cheng-Chwee Kuik, Sueo Sudo, 2016-03-10 Institutional activities have remarkably transformed East Asia a region once known for the absence of regionalism and regime building efforts Yet the dynamics of this Asian institutionalization have remained an understudied area of research This book offers one of the first scholarly attempts to clarify what constitutes institutionalization in East Asia and to systematically trace the origins discern the features and analyze the prospects of ongoing institutionalization processes in the world s most dynamic region *Institutionalizing East Asia* comprises eight essays grouped thematically into three sections Part I considers East and Southeast Asia as focal points of inter state exchanges and traces the institutionalization of inter state cooperation first among the Southeast Asian states and then among those of the wider East Asia Part II examines the institutionalization of regional collaboration in four domains economy security natural disaster relief and ethnic conflict management Part III discusses the institutionalization dynamics at the sub regional and inter regional levels The essays in this book offer a useful source of reference for scholars and researchers specializing in East Asia regional architecture and institution building in international relations They will also be of interest to postgraduate and research students interested in ASEAN the drivers and limits of international cooperation as well as the role of regional multilateralism in the Asia Pacific region

The Unintended Consequences of Peace Arie Marcelo Kacowicz, Exequiel Lacovsky, Keren Sasson, 2021-07 A rigorous global examination of the links between peaceful borders and illicit transnational flows of crime and terrorism

Power in a Complex Global System Louis W. Pauly, Bruce W. Jentleson, 2014-05-09 Can twenty first century global challenges be met through the limited adaptation of existing political institutions and prevailing systemic norms or is a more fundamental reconstitution of governing authority unavoidable Are the stresses evident in

domestic social compacts capable of undermining the fundamental policy capacity of contemporary governments This book inspired by the work of the distinguished scholar Peter J Katzenstein examines these important and pressing questions In a period of complex political transition the authors combine original research and intensive dialogue to build on Katzenstein s innovative insights They highlight his seminal work on variations in domestic structures on the role of ideologies of social partnership on the regionally differentiated foundations of political legitimation on diverse conceptions of civilization and on the idea and practice of power in a tenuous American imperium Together the chapters map the complex terrain upon which legitimate political authority and effective policy capacity will have to be reconstituted to address twenty first century global regional and state level challenges The book will be of great interest to students and scholars in international organization global governance foreign policy analysis and comparative politics

Japan's Arduous Rejuvenation as a Global Power Victor Teo,2019-04-08 This open access book assesses the profound impact of Japan s aspirations to become a great power on Japanese security democracy and foreign relations Rather than viewing the process of normalization and rejuvenation as two decades of remilitarization in face of rapidly changing strategic environment and domestic political circumstances this volume contextualizes Japan s contemporary international relations against the longer grain of Japanese historical interactions It demonstrates that policies and statecraft in the Prime Minister Shinzo Abe s era are a continuation of a long unbroken and arduous effort by successive generations of leaders to preserve Japanese autonomy enhance security and advance Japanese national interests Arguing against the notion that Japan cannot work with China as long as the US Japan alliance is in place

the book suggests that Tokyo could forge constructive relations with Beijing by engaging China in joint projects in and outside of the Asia Pacific in issue areas such as infrastructure development or in the provision of international public goods. It also submits that an improvement in Japan China relations would enhance rather than detract Japan US relations and that Tokyo will find that her new found autonomy in the US Japan alliance would not only accord her more political respect and strategic latitude but also allow her to ameliorate the excesses of American foreign policy adventurism paving for her to become a truly normal great power.

The Struggle for Order Evelyn Goh, 2013-08-15 Arguing that existing ideas about balance of power and power transition are inadequate this book gives an innovative reinterpretation of the changing nature of U S power focused on the order transition in East Asia.

Governance in Pacific Asia Peter Ferdinand, 2012-01-19 The book examines the political economy of the states of Pacific Asia stretching from Japan to Burma since the end of WWII.

The Indo-Pacific Theatre Srabani Roy Choudhury, 2022-11-30 This book studies the internal framework of the Indo Pacific region and examines the strategic issues faced by the countries that belong to it. Over the years the Indo Pacific region has become a prime driver of global economic growth and has generated considerable interest from countries both within and without. The region is now witnessing an intensified great power competition for greater geostrategic space thus shaping the 21st century world order. The volume focuses on the emerging strategies of the main actors involved in this competition. It discusses various key issues such as the purpose of the Quadrilateral Security Dialogue and its post pandemic agenda, the conceptualisation of a Free and Open Indo Pacific FOIP amid an intensifying Sino US great power competition, the strategies of ASEAN and South Korea, China's activities in the Indo Pacific economic architecture and supply chain disruption in the region as well as the geopolitical strategy of the European Union for the Indo Pacific. A crucial study of the Indo Pacific region in the post COVID 19 world, the book gives fresh insights into the areas of convergence and divergence in the strategic visions of the many regional actors. It will be of great interest to policymakers as well as students and academics in the fields of political science, international relations, foreign policy, geopolitics, security studies, strategic studies as well as area studies, namely East and Southeast Asian studies, European Union studies, American studies and Australian studies.
