Dyslexia and Hyperlexia P. G.

Aaron,2012-12-06 Even though I had been studying reading problems in children for a number of years as a means of understanding cognitive processes I became deeply committed to the study of developmental dyslexia after my encounter with S H a dyslexic college student Until then dyslexia to me remained an interesting phenomenon but somewhat removed from the mainstream of my research interests The facts that in spite of his superior IQ S H could read no better than a child in the fifth grade and misspelled even common words such as was and here however took me by surprise and made me appreciate the intriguing and challenging nature of developmental dyslexia This led to a series of studies of college students with reading disability a group that is relatively unexplored The general plan of these investigations was to study a small number of disabled readers at any given time rather intensively Even though this approach limits the generalizability of the research findings it lays bare some of the most interesting facts about dyslexia which are obscured in large scale statistical studies These studies have now extended well over a decade and are still continuing As soon as these studies were started it became obvious that not all reading disabled college students are alike and that disabled readers could be classified into three broad categories those with poor decoding skill those with poor comprehension ability and those with a combination of these two deficits

Dyslexia, Learning, and the Brain Roderick Nicolson,Angela Fawcett,2010-08-13 A unique overview of research on dyslexia and an account of the underlying causes at cognitive brain and neural system levels that provides a framework for significant progress in the understanding of dyslexia and other related learning disabilities Dyslexia research has made dramatic progress since the mid 1980s Once discounted as a middle class myth dyslexia is now the subject of a complex and

confusing body of theoretical and empirical research In *Dyslexia Learning and the Brain* leading dyslexia researchers Roderick Nicolson and Angela Fawcett provide a uniquely broad and coherent analysis of dyslexia theory Unlike most dyslexia research which addresses the question what is the cause of the reading disability called dyslexia the authors work has addressed the deeper question of what is the cause of the learning disability that manifests as reading problems This perspective allows them to place dyslexia research within the much broader disciplines of cognitive psychology and cognitive neuroscience and has led to a rich framework including two established leading theories the automatization deficit account 1990 and the cerebellar deficit hypothesis 2001 Nicolson and Fawcett show that extensive evidence has accumulated to support these two theories and that they may be seen as subsuming the established phonological deficit account and sensory processing accounts Moving to the explanatory level of neural systems they argue that all these disorders reflect problems in some component of the procedural learning system a multiregion system including major components of cortical and subcortical regions The authors answer to the fundamental question what is dyslexia offers a challenge and motivation for research throughout the learning disabilities laying the foundations for future progress

Schools for Special Needs 2012-2013 Gabbittas, 2012-11-03 Special needs provision continues to be the focus of much attention A growing emphasis on the importance of meeting individual and often complex needs means that finding the right school for your child can be a complicated process *Schools for Special Needs* is an indispensable aid for anyone investigating the legal and practical aspects of SEN provision for children and young people at all stages of education Included in this edition assessment and identification of needs statementing suitable provision and school choice coverage of all special needs from ADHD and Autism to Speech and Language Difficulty and Visual Impairment where to seek help parents rights and the role of the local authority the Special Educational Needs Code of Practice directories of independent and non maintained special schools colleges and support services state maintained special schools and mainstream independent schools with specialist provision To see schools online visit the Guide s website at www.schoolsforspecialneeds.co.uk

Spelling, Handwriting and Dyslexia Diane Montgomery, 2006-11-22 This ground breaking book argues that spelling and writing need to be given more consideration in teaching and remedial settings especially if dyslexic pupils are to be helped back up to grade level and other pupils are to make more effective quicker progress Helping teachers and student teachers to understand the valuable contribution spelling and handwriting makes to literacy development in primary and secondary schools this book shows them how to overcome existing barriers to learning Chapters cover key topics such as the nature of spelling and the impact of the National Literacy Strategy the strengths and weaknesses of existing schemes for handwriting the definitions of dyslexia and how common spelling errors by dyslexics are made making effective links between strategic assessment and strategic interventions in schools problem based learning underpinned by plenty of casestudies and real life classroom examples Written by a well known author in the field of literacy and dyslexia this is a core text that will interest teachers teacher
