

An extensive test programme led to the development and certification of an optional kit for the T77, including deflation valves on the inside and outside bags, an inflation-restraint switch on the outside of the aircraft, protection on the inflating bags and for the hydraulic brake line and the speed brake control system, strengthening of the Y101, D600 and A7C aircraft on the underside of the fuselage and vertical stabilizers ("blow-away pins") beneath the engine brackets. The modification on the forward-rotating nose wheel is of such nature that it cannot be found in the normal wheel and axle.
