

SECTION 3: KNOW THE EDGER

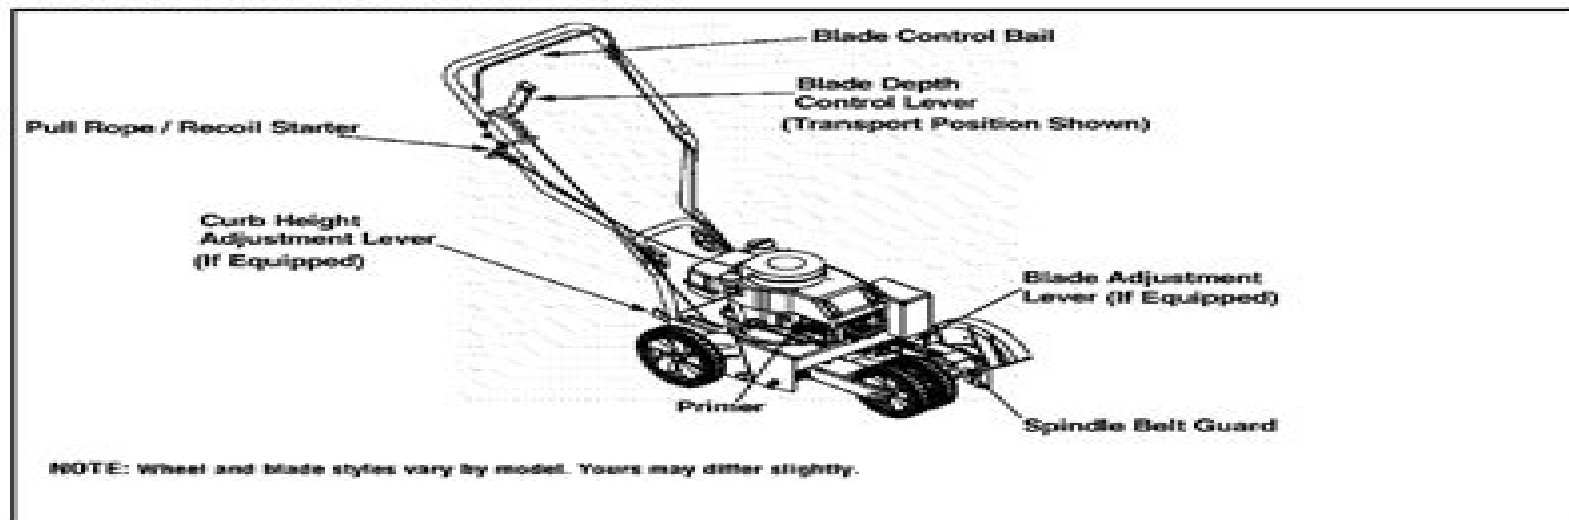

Figure 4

WARNING: Be familiar with all controls and their proper operation. Know how to stop the machine and disengage them quickly.

NOTE: Refer to the Engine Manual packed with your edger for a detailed description of all engine-related controls and components.

Pull Rope / Recoil Starter

The pull rope/recoil starter is used to start the engine.

Primer

The primer is used to pump gas into the carburetor and aid in starting the engine. Use it to start a cold engine, but do not use it to restart a warm engine after a short shutdown.

NOTE: Refer to the Engine Manual packed with your edger for a detailed description of all engine-related controls and components.

Blade Control Bail

Located on the upper handle, the blade control bail must be depressed against the upper handle in order to operate the unit. Releasing the blade control stops the engine and the edger blade. See Figure 4.

Blade Depth Control Lever

The blade depth control lever is located on the right side of the upper handle. It is used to control the depth of the cut. The further forward the blade depth control lever is moved, the deeper into the soil the edger blade will cut. See Figure 4.

Blade Adjustment Lever (if so equipped)

The blade adjustment lever, if so equipped, is located on the front, left portion of the edger, behind the edger blade. It is used to vary the angle of the edger blade between one of three positions for edging, beveling, or trenching. See Figure 4.

Curb Height Adjustment Lever (if so equipped)

The curb height adjustment lever, if so equipped, is found on the rear portion of the edger. When placed in an applicable notch, it aids in stabilizing the edger while edging grass along a curb. See Figure 4.

IMPORTANT: Become familiar with all the controls before operating the edger.
