Preclinical and clinical issues in Alzheimer's disease drug research and development Cesare Mancuso, Silvana Gaetani, 2015-03-03 Alzheimer's disease AD is a chronic neurodegenerative disorder characterized by progressive cognitive dysfunction and memory loss inability to perform the activities of daily living and mood disorders According to the so called amyloid cascade hypothesis amyloid peptide A produced by beta and gamma secretase mediated cleavages of the amyloid precursor protein APP plays a pivotal role in the pathogenesis of AD A was also shown to contribute to AD pathology by stimulating the hyperphosphorylation of tau which is responsible for the formation of neurofibrillary tangles However the amyloid cascade hypothesis was challenged by other theories which lend support to the idea that A is not causative but can be considered as an innocent bystander in AD Although preclinical research generated impressive lines of evidence about the several intracellular mechanisms whose impairment leads to the onset and progression of AD clinical research aimed at the development of new drugs capable of preventing or delaying the onset of neuronal damage in AD patients has produced limited results The drugs currently available for the treatment of AD are acetylcholinesterase inhibitors AChEI and the NMDA glutamate receptor antagonist memantine The AChEI increase acetylcholine levels in the synaptic cleft which are reduced because of the progressive damage of cholinergic neurons in cognitive brain areas e.g. amygdala hippocampus and frontal cortex whereas memantine is used to prevent reduce calcium dependent excitotoxic neuronal cell death Both classes of drugs have been shown to improve symptoms related to cognitive decline but their effects are confined largely to patients with mild to moderate AD in particular during the first year or so of treatment An alternative to this symptomatic treatments involves the use of drugs that intervene

in the pathogenesis of the disease Recently monoclonal antibodies against A were proposed as novel agents capable to remove A from the brain thus preventing neuronal damage The research topic focuses on the preclinical and clinical evidence about the several factors that contribute to the pathogenesis of AD as well as the potential therapeutic role of new classes of drugs still under preclinical or clinical development *Musculoskeletal Research and Basic Science* Feza

Korkusuz,2015-11-26 Strong roots in basic science and research enhance clinical practice This book is a rich source of information for basic scientists and translational researchers who focus on musculoskeletal tissues and for orthopedic and trauma surgeons seeking relevant up to date information on molecular biology and the mechanics of musculoskeletal tissue repair and regeneration The book opens by discussing biomaterials and biomechanics with detailed attention to the biologic response to implants and biomaterials and to the surface modification of implants an important emerging research field Finite element analysis mechanical testing standards and gait analysis are covered All these chapters are strongly connected to clinical applications After a section on imaging techniques musculoskeletal tissues and their functions are addressed the coverage including for example stem cells molecules important for growth and repair regeneration of cartilage tendons ligaments and peripheral nerves and the genetic basis of orthopedic diseases State of the art applications such as platelet rich plasma were included Imaging is a daily practice of scientists and medical doctors Recent advancements in ultrasonography computerized tomography magnetic resonance bone mineral density measurements using dual energy X ray absorptiometry and scintigraphy was covered following conventional radiography basics Further extensive sections are devoted to pathology oncogenesis and tumors and pharmacology Structure is always related with function Surgical anatomy was therefore covered extensively in the last section **Bone and Development** Felix Bronner,Mary C.
