pieces of the puzzle together and get your life and brain back Here s an excerpt from the book Knowing what s going on up in your brain is HUGE So much of how we interact with the world around us is a completely normal response when we take into account our past experiences and how our brains work Freaking the fuck out Avoiding important shit we need to take care of Feeling pissed off all the time Being a dick to people we care about Putting shit in our bodies that we know isn t good for us Doing shit we know is dumb or pointless None of these things are fucking helpful But they all make sense Your brain has adapted to the circumstances in your life and started doing things to protect you bless it It s not TRYING to fuck you over even though it totally is at times As we navigate the world nasty shit happens The brain stores info about the nasty shit to try to avoid it in the future Sometimes these responses are helpful Sometimes the responses become a bigger problem than the actual problem was It s called a trauma reaction And even if you aren t dealing with a specific trauma Adaptive coping strategies bad habits and funky behaviors all wire in similar ways And research is showing that these issues are actually some of the easier ones to treat in therapy if we address what s really going on rather than just the symptoms
