People before Markets Daniel Scott Souleles, Johan Gersel, Morten Sørensen Thaning, 2022-11-03 This innovative volume presents twenty comparative case studies of important global questions such as Where should our food come from What should we do about climate change and Where should innovation come from A variety of solutions are proposed and compared including market based economic and neoliberal approaches as well as those determined by humane values and ethical and socially responsible perspectives Drawing on original research its chapters show that more responsible solutions are very often both more effective and better aligned with human values Providing an important counterpoint to the standard capitalist thinking propounded in business school education People Before Markets reveals the problematic assumptions of incumbent frameworks for solving global problems and inspires the next generation of business and social science students to pursue more effective and human centered solutions

Personalism and Personalist Regimes Alex Baturo, Luca Anceschi, Francesco Cavatorta, 2024-07-04 Personalist leaders such as Russia's Vladimir Putin Belarus's Alexander Lukashenko or Venezuela's Nicol's Maduro are increasingly prominent players in the international landscape their motivations and policies however are poorly understood The regimes they lead are difficult to examine mostly because of their most defining feature an inordinate concentration of power in the hands of one single individual Yet personalist leaders do not rule alone even if they do not always govern through institutional channels How do personalist regimes really work How do their rulers acquire and maintain personal control How does contemporary personal rule differ from how it was practised during the Cold War These are the key questions addressed in Personalism and Personalist Regimes which offers a

systematic examination of the logic of personalism or personalist rule tackling comprehensively the study of personalist leaders and personalist regimes The book is underpinned by a theoretical framework that combines historical and comparative analyses brought forward through a series of detailed country studies authored by a distinguished group of comparativists and area studies experts The book also revisits and builds upon *Sultanistic Regimes* the seminal study by H E Chehabi and Juan Linz In contrast to *Sultanistic Regimes* that studied sultanism an extreme form of personalism *Personalism and Personalist Regimes* examines personal rule on its full continuum from Turkey under Erdo an or Venezuela under Maduro to Turkmenistan under Berdimuhamedov or Libya under Gaddafi Because personalism or personal rule can be present across all regimes the book also includes several studies of personalism and institutions in party dictatorships China or Cuba amongst others

Symbols and the Image of the State in Eurasia Anita Sengupta, 2016-10-14 This book discusses the significance of cultural symbols images in the nation building of Eurasian states that emerged out of the former Soviet Union It particularly focuses on the cases of Uzbekistan and Kazakhstan in the post Soviet era and argues that the relationship between nation and image building has been particularly relevant for Eurasian states In an increasingly globalized world nation state building is no longer an activity confined to the domestic arena The situating of the state within the global space and its image in the international community nation branding becomes in many ways as crucial as the projection of homogeneity within the state The relationship between politics and cultural symbols images therefore acquires and represents multiple possibilities It is these

possibilities that are the focus of Symbols and the Image of the State in Eurasia It argues that the relationship between politics and cultural symbols images became particularly relevant for states that emerged in the wake of the disintegration of the Soviet Union in Central Asia It extends the argument further to contend that the image that the state projects is largely determined by its legacy and it attempts to do this by taking into account the Uzbek and Kazakh cases In the shaping of the post Soviet future these legacies and projections as well as the policy implications of these projections in terms of governmentality and foreign policy have been decisive *Living Politics in the City* Marion Hohlfeldt ,Carmen Popescu,2023-03-15 Public space and performativity from the perspective of architecture In recent decades architecture has been seen as a field of practice that contributes greatly to the performativity of public space In spite of the explosion of virtual communities through social media and the limitations imposed by pandemics architecture today still holds an active role in literally building our societies Bearing in mind its acute politicisation in past years *Living Politics in the City* looks at public space from the perspective of architecture and its effective contribution not as a prop but as an actual catalyst for embodying politics The essays gathered here span five continents activating various disciplinary approaches to architecture and examining it in different contexts from a Palestinian refugee camp to the most vibrant urban axis in Sao Paulo from the numerous city squares around the world crowded with rebellious populations to the proximal politics of housing in Australia Contributors Endriana Audisho University of Technology Sydney Maja Babic Charles University Alexandra Biehler Ecole Nationale Sup rieur e d Architecture de Marseille Tracey Bowen University of Toronto Mississauga Etienne Delprat Rennes 2 University Claudia Faraone IUAV Venice School of Architecture ETICity Caterina Frisone Oxford Brookes University Catherine Grout ENSAPL Lille Pavel Kunysz University of Li ge Flavia Marcello Swinburne University of Technology Eric Le Coguiec University of Li ge Tova Lubinsky University of Technology Sydney Giovanna Muzzi IUAV Venice School of Architecture ETICity Can Onaner Ecole Nationale Sup rieur e d Architecture de Bretagne Shadi Saleh KU Leuven Fr d ric Sotinel Ecole Nationale Sup rieur e d Architecture de Bretagne Karolina Wilczynska Adam Mickiewicz University Ian Woodcock Swinburne University of Technology This publication is GPRC labeled Guaranteed Peer Reviewed Content

Remains of the Soviet Past in Estonia Francisco Martinez,2018-07-06 What happens to legacies that do not find any continuation In Estonia a new generation that does not remember the socialist era and is open to global influences has grown up As a result the impact of the Soviet memory in people s conventional values is losing its effective power opening new opportunities for repair and revaluation of the past Francisco Martinez brings together a number of sites of interest to explore the vanquishing of the Soviet legacy in Estonia the railway bazaar in Tallinn where concepts such as market and employment take on distinctly different meanings from their Western use Linnahall a grandiose venue whose Soviet heritage now poses diffi cult questions of how to present the building s history Tallinn s cityscape where the social spatial and temporal co evolution of the city can be viewed and debated Narva a city that marks the border between the Russian

Federation NATO and the European Union and represents a place of continual negotiation of belonging and the new Estonian National Museum in Raadi an area on the outskirts of Tartu that has been turned into a memory field The anthropological study of all these places shows that national identity and historical representations can be constructed in relation to waste and disrepair too also demonstrating how we can understand generational change in a material sense Praise for Remains of the Soviet Past in Estonia By adopting the tropes of repair and waste this book innovatively manages to link various material registers from architecture intergenerational relations affect and museums with ways of making the past present Through a rigorous yet transdisciplinary method Mart nez brings together different scales and contexts that would often be segregated out In this respect the ethnography unfolds a deep and nuanced analysis providing a useful comparative and insightful account of the processes of repair and waste making in all their material social and ontological dimensions Victor Buchli Professor of Material Culture at UCL This book comprises an endearingly transdisciplinary ethnography of postsocialist material culture and social change in Estonia Mart nez creatively draws on a number of critical and cultural theorists together with additional research on memory and political studies scholarship and the classics of anthropology Grappling concurrently with time and space the book offers a delightfully thick description of the material effects generated by the accelerated post Soviet transformation in Estonia inquiring into the generational specificities in experiencing and relating to the postsocialist condition through the conceptual anchors of wasted legacies and repair This book defies disciplinary boundaries and shows how an attention to material relations and affective infrastructures might reinvigorate political theory Maria M Iksoo Senior Lecturer Brussels School of International Studies at the University of Kent

Living in Digital Worlds Naomi Jacobs, Rachel Cooper, 2018-01-29 Living in Digital Worlds investigates the relationship between human society and technology as our private and particularly our public lives are increasingly undertaken in spaces that are inherently digital digital public spaces The book unpicks why digital technology is such an inextricable part of modern society first by examining the historical relationship between technological development and the early progression of human sociality This is then followed by an examination of the ways in which modern life is currently being impacted by the expansion of digital information and devices into multiple aspects of our lives including focuses on privacy bias and ownership in digital spaces Finally it explores potential future developments and their implications and proposes that it is crucial to consider the design of technology and systems in order to support a positive and beneficial direction of change Each chapter includes case studies primarily drawn from The Creative Exchange a fiveyear programme which ran from 2012 to 2016 to explore the notion of the digital public space through collaborative cross sector research

Love Lives Carol Dyhouse, 2021-02-11 The story of how women s lives loves and dreams have been re shaped since 1950 the year of Walt Disney s Cinderella and a time when teenage girls dreamed of marriage Mr Right and happy endings Cinderella stories captured the imagination of girls in the 1950s when dreams of meeting the right man could seem like a happy ending a solution to life s problems But over the next fifty years women s lives were transformed not by the magic wand of a fairy godmother nor by marrying princes but by education work birth control and feminism However while widening opportunities for women were seen as progress feminists were regularly caricatured as man haters cast in the role of ugly sisters witches or wicked fairies in the fairy tale This book is about the reshaping of women s lives loves and dreams since 1950 the year in which Walt Disney s film Cinderella gave expression to popular ideas of romance and at a time when marriage was a major determinant of female life chances and teenage girls dreamed of Mr Right and happy endings It ends with the runaway success of Disney s Frozen in 2013 a film with relevance to very different times Along the way it illuminates how women s expectations and emotional landscapes have shifted asking bold questions about how women s lives have been transformed since 1950 How have women s changing life experiences been mirrored in new expectations about marriage intimacy and family life How have new forms of independence through education and work and greater control over childbearing altered women s life ambitions And were feminists right to believe that sexual equality would improve relationships between men and women
