and molecular classification towards personalized cancer therapy Volume II <https://doi.org/10.1007/978-1-4939-9143-6> has over 8 accepted articles and further manuscripts currently under review Due to the continued success of these Research Topics and the interest in the subject we will launch a third volume on the same topic Inferring cancer tissue of origin and molecular classification are two critical problems in personalized cancer therapy It is known that there are about 5% cancers of unknown primary CUP site These kinds of patients are under empirical chemotherapy which leads to a very low survival rate Thus it is important to infer cancer tissue of origin However experimental methods usually fail to identify the exact tissue of origin even after the death of a patient which provides a need for computational methods especially in the era of big biomedical data Based on the finding that gene expressions of metastasis cancer cells are more similar to those of original tissue than metastasis tissue there have been a few computational methods developed in this area However the accuracy of the methods is yet to be improved to assure a clinical usage In addition to CUP inferring cancer tissue of origin is also important in avoiding misdiagnosis even if the cancer origin is known **New Progress in Cancer Biomarkers and Therapy** Guohui Sun, Wei Zhang, Jianhua Wa, Chengwei He, 2024-03-18 As we know cancer is an important disease threatening human health According to the latest statistics in Global Cancer Statistics 2020 cancer is expected to overtake cardiovascular disease as the leading cause of premature death in most countries this century That sounds pretty terrible but it is believed that this situation should be better along with the advances in tumor biology There is no doubt that biomarkers have very significant clinical implications which can be used for early diagnosis monitoring progress and predicting the prognosis of cancer *The Saturday Review of Politics, Literature, Science and Art*, 1880 **Mineral solubilizing microorganisms (MSM) and their applications in nutrient availability, weathering and bioremediation** Muhammad Zahid Mumtaz, Maqshoof Ahmad, Hassan Etesami, Adnan Mustafa, 2023-03-01 **Emerging insights into immunological mechanisms driving neurological and psychiatric diseases** Juehua Yu, Mingyao Ying, Xiaobo Mao, Lei Sun, Joseph Scafidi, 2023-04-06 **Novel biomarkers for anticancer therapy** Hongtao Xiao, Zhe-Sheng Chen, Liang Ouyang, Ting Wang, Chen Shi, 2023-02-07 **Education and Health as Social Determinants: The Econeurobiology of Brain Development** Raed Z. New Directions in Archaeological Science Andrew S. Fairbairn, Sue O'Connor, Benjamin Marwick, 2009-02-01 Archaeological Science meetings will have a personality of their own depending on the focus of the host archaeological fraternity itself The 8th Australasian Archaeometry meeting follows this pattern but underlying the regional emphasis is the continuing concern for the processes of change in the landscape that simultaneously effect and illuminate the archaeological record These are universal themes for any archaeological research with the increasing employment of science based studies proving to be a key to understanding the place of humans as subjects and agents of change over time This collection of refereed papers covers the thematic fields of geoarchaeology archaeobotany materials analysis and chronometry with particular emphasis on the first two The editors Andrew Fairbairn Sue O Connor and Ben Marwick outline the special value of these contributions in the introduction The international nature of archaeological science will mean that the advances set out in these papers will find a receptive audience among many archaeologists elsewhere There is no doubt that the story that Australasian archaeology has to tell has been copiously enriched by incorporating a widening net of advanced science based studies This has brought attention to the nature of the environment as a human artefact a fact now more widely appreciated and archaeology deals with these artefacts among others in this way in this publication
