The F-82 Twin Mustang was conceived during WWII as a long range fighter escort. Like the P-51 it was designed by North American's brilliant engineer Edgar Schmued. The F-82 utilized two extended P-51 fuselages mounted to a newly designed center wing and tail. The plane incorporated new propeller assemblies and a unique four wheel landing gear. In short while the plane would be cosmetically similar to the Mustang in reality it was an entirely new beast. The F-82 wasn't ready before WWII ended but the program escaped cancellation and planes entered operational service in 1948. The F-82 became the last piston powered fighter ordered by the USAF. It flew as an escort for SAC B-29s and with distinction as a night fighter in Korea. It was retired in 1953. Originally printed by the USAF and North American this pilot's handbook provides a glimpse inside the cockpit of this warbird. Originally classified Restricted the manual was declassified and is here reprinted in book form.
