Beastly Morality Animals Ethical Agents:

Beastly Morality Jonathan K. Crane, 2015-12-01 We have come to regard nonhuman animals as beings of concern and we even grant them some legal protections But until we understand animals as moral agents in and of themselves they will be nothing more than distant recipients of our largesse Featuring original essays by philosophers ethicists religionists and ethologists including Marc Bekoff Frans de Waal and Elisabetta Palagi this collection demonstrates the ability of animals to operate morally process ideas of good and bad and think seriously about sociality and virtue Envisioning nonhuman animals as distinct moral agents marks a paradigm shift in animal studies as well as philosophy itself Drawing not only on ethics and religion but also on law sociology and cognitive science the essays in this collection test long held certainties about moral boundaries and behaviors and prove that nonhuman animals possess complex reasoning capacities sophisticated empathic sociality and dynamic and enduring self conceptions Rather than claim animal morality is the same as human morality this book builds an appreciation of the variety and character of animal sensitivities and perceptions across multiple disciplines moving animal welfarism in promising new directions

Eating Ethically Jonathan K. Crane, 2017-12-19 Few activities are as essential to human flourishing as eating and fewer still are as ethically fraught Eating well is particularly confusing We live amid excess faced with conflicting recommendations contradictory scientific studies and complex moral medical and environmental consequences that influence our choices A new eating strategy is urgently needed one grounded in ethics informed by biology supported by philosophy and theology and ultimately personally achievable Eating Ethically argues persuasively for more adaptive eating practices Drawing on religion medicine philosophy cognitive science art ethics and more Jonathan K Crane shows how distinguishing among the eater the eaten and the act of eating promotes a radical reorientation away from external cues and toward internal ones This turn is vital for survival according to classic philosophy on appetite and contemporary studies of satiety metabolic science as well as metaphysics and religion By intertwining ancient wisdom from Judaism Christianity and Islam with cutting edge research Crane concludes that ethical eating is a means to achieve both personal health and social cohesion Grounded in science and tradition Eating Ethically shows us what it truly means to eat well Biocommunication: Sign-mediated Interactions Between Cells And Organisms Richard Gordon, Joseph Seckbach, 2016-11-01 All coordination between cells organs and organisms depends on successful biocommunicative processes There are abundant cases of communication in the biological world both within intraspecific and between interspecific single cell and multicellular microorganisms and higher animal forms Split into two parts this book first looks at the history development and progress within the field of biocommunication The second part presents real life case studies and investigation into examples of biocommunication in the biological world Among the organisms covered are bacteria fungi plants terrestrial and marine animals including bonobos chimpanzees and dolphins as well as a new theory of communication between parts in developing embryos cybernetic embryos Contributions from international experts in the field provide up to date research and results while in depth analysis expands on these findings to pave the way for future discoveries As the first comprehensive review of its kind it is perfect for undergraduates graduates professionals and researchers in the field of life sciences *Animals in Heaven?* Terry Martin, 2024-09-26 Christians of all traditions have often puzzled with the question Do dogs go to heaven Drawing on Catholic teaching and on his long pastoral experience as a parish priest Terry Martin expands that concept to consider wider issues around all animals domesticated and free living and why they are here Within a context of Christian faith he seeks to understand the place of animals in God s complex creation and the relationship that human beings have for good or ill with those animals More than that he looks at the big questions which so many ask about who under God animals are and what meaning if any animal lives have from a Catholic Christian perspective An Ethical View of Human-Animal Relations in the Ancient Near East Idan Breier, 2022-10-19 Exploring the earliest literary evidence for human animal relations this volume presents and analyzes biblical and Mesopotamian Sumerian Assyrian and Babylonian sources from the third millennium BCE through to the consolidation of the biblical literature in the first millennium BCE Key Features Provides the first

Animal Ethics in the Age of Humans Bernice Bovenkerk, Jozef Keulartz, 2016-09-21 This book provides reflection on the increasingly blurry boundaries that characterize the human animal relationship In the Anthropocene humans and animals have come closer together and this asks for rethinking old divisions Firstly new scientific insights and technological advances lead to a blurring of the boundaries between animals and humans Secondly our increasing influence on nature leads to a rethinking of the old distinction between individual animal ethics and collectivist environmental ethics Thirdly ongoing urbanization and destruction of animal habitats leads to a blurring between the categories of wild and domesticated animals Finally globalization and global climate change have led to the fragmentation of natural habitats blurring the old distinction between in situ and ex situ conservation In this book researchers at the cutting edge of their fields systematically examine the broad field of human animal relations dealing with wild liminal and domestic animals with conservation and zoos and with technologies such as biomimicry This book is timely in that it explores the new directions in which our thinking about the human animal relationship are developing While the target audience primarily consists of animal studies scholars coming from a wide range of disciplines including philosophy sociology psychology ethology literature and film studies many of the topics that are discussed have relevance beyond a purely theoretical one as such the book also aims to inspire for example biologists conservationists and zoo keepers to reflect on their relationship with animals

Animals as Legal Beings Maneesha Deckha, 2020 In *Animals as Legal Beings* Maneesha Deckha critically examines how Canadian law and by extension other legal orders around the world participate in the social construction of the human animal divide and the abject rendering of animals as property Through a rigorous but cogent analysis Deckha calls for replacing the exploitative property classification for animals with a new transformative legal status or subjectivity called beingness In developing a new legal subjectivity for animals one oriented toward respecting animals for who they are rather than their proximity to idealized versions of humanness *Animals as Legal Beings* seeks to bring critical animal theorizations and animal law closer together Throughout Deckha draws upon the feminist animal care tradition as well as feminist theories of embodiment and relationality postcolonial theory and critical animal studies Her argument is critical of the liberal legal view of animals and directed at a legal subjectivity for animals attentive to their embodied vulnerability and desirous of an animal friendly cultural shift in the core foundations of anthropocentric legal systems Theoretically informed yet accessibly presented *Animals as Legal Beings* makes a significant contribution to an array of interdisciplinary debates and is an innovative and astute argument for a meaningful more than human turn in law and policy

Sex, Gender, Ethics and the Darwinian Evolution of Mankind Michel Veuille, 2024-06-28

Sex Gender Ethics and the Darwinian Evolution of Mankind examines the impact of Darwin's *Descent of Man* on contemporary biology and the humanities. Its publication in 1871 was a founding event in anthropology. Its content was primarily concerned with the development of sexual life, social life, and intellectual life, not only as outcomes of evolution but as components that have actively intermixed over time with the evolutionary mechanism of natural selection. The stamp of Darwinism on modern thought is still very important and brings novelties to academic studies. Several fields influenced by Darwinian anthropology developed in recent decades, including evolutionary ethics, the evolution of sociality, and sexual communication in animal and plant species. Sociobiology and evolutionary psychology are topics that draw heavily on Darwin's *Descent of Man*. The understanding of Darwin's thought has also progressed greatly in recent decades following the systematic study of Darwin's correspondence and notebooks, leading to a reassessment of the development of his thought on humans, social groups, and heredity, and how they come together in his theory of evolution. The book combines a historical perspective on Darwin's achievement and his legacy. It will be of interest to students and scholars in a variety of fields, from experimental biology to the social and historical sciences.
