Leone International Monetary Fund. African Dept.,2022-07-29 Selected Issues **Indigenist African Development and Related Issues** Akwasi Asabere-Ameyaw,Jophus Anamuah-Mensah,George Sefa Dei,Kolawole Raheem,2014-07-11 There is no term so heavily contested in social science literature nomenclature than Development This book brings Indigenous perspectives to African develop ment It is argued that contrary to development as we know it not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since everything we do about our world is development So how come there is difficult knowledge when it comes to learning from what we know i e what local peoples do and have done for centuries as a starting point to recon structing and reframing development In getting our heads around this paradox we are tempted to ask more

questions How do we as African scholars and researchers begin to develop home grown solutions to our problems How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development i e Indigenist African development see also Yankah 2004 How do we speak of Indigenist development mindful of global developments and entanglements around us Can we afford to pursue development still mired in a catch up scenario Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line A Publication of the Centre for School and Community Science and Technology Studies SACOST University of Education Winneba Ghana *War, Women and Post-conflict Empowerment* Josephine Beoku-Betts, Fredline A.

M'Cormack-Hale, 2022-01-13 Since the 1991 2002 civil conflict ended in Sierra Leone the country has failed to translate the accomplishments of women's involvement in bringing the war to an end into meaningful political empowerment This is in marked contrast to other post conflict countries which have increased the political participation of women in elected and appointed office increased the representation of women in leadership positions and enacted constitutional reforms promoting women's rights Written by Sierra Leonean and Africanist scholars and experts from a broad range of disciplines this unique volume analyses the historical and contextual factors influencing women's political economic and social development in the country In drawing on a diverse array of case studies from health to education refugees to international donors the contradictions successes and challenges of women's lives in a post conflict environment are revealed making this an essential book for anyone involved in women and development *Children, Childhood, and the Future* Andrea

Kleeberg-Niepage, 2020-01-10 Although most of the world's children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children's lives Modern Mathematics Dirk De Bock, 2023-03-08 The international New Math developments between

about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few

chapters show how the initial leadership came from mathematicians in European nations and in the United States of America. The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki. In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges. This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite. Undoubtedly this is a landmark publication in education. The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective. The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends.

Football and Migration Richard Elliott, John Harris, 2014-09-19 Football is an incredibly powerful case study of globalization and an extremely useful lens through which to study and understand contemporary processes of international migration. This is the first book to focus on the increasingly complex series of migratory processes that contour the contemporary game drawing on multi disciplinary approaches from sociology history geography and anthropology to explore migration in football in established emerging and transitional contexts. The book examines shifting migration patterns over time and across space and analyses the sociological dynamics that drive and influence those patterns. It presents in depth case studies of migration in elite men s football exploring the role of established leagues in Europe and South America as well as important emerging leagues on football s frontier in North America and Asia. The final section of the book analyses the movement of groups who have rarely been the focus of migration research before including female professional players elite youth players amateur players and players families drawing on important new research in Ghana England Haiti and the Dominican Republic. Few other sports have such a global reach and therefore few other sports are such an important location for cross cultural research and insight across the social sciences. This book is engaging reading for any student or scholar with an interest in sport sociology human geography migration international labour flows globalization development or post colonial studies.
