## **Beam The Race To Make The Laser:**

**Beam : The Race to Make the Laser** Jeff Hecht, 2005-02-11 In 1954 Charles Townes invented the laser's microwave cousin the maser. The next logical step was to extend the same physical principles to the shorter wavelengths of light but the idea did not catch fire until October 1957 when Townes asked Gordon Gould about Gould's research on using light to excite thallium atoms. Each took the idea and ran with it. The independent-minded Gould sought the fortune of an independent inventor; the professorial Townes sought the fame of scientific recognition. Townes enlisted the help of his brother-in-law Arthur Schawlow and got Bell Labs into the race. Gould turned his ideas into a patent application and a million-dollar defense contract. They soon had company. Ali Javan, one of Townes's former students, began pulling 90-hour weeks at Bell Labs with colleague Bill Bennett. And far away in California a bright young physicist named Ted Maiman became a very dark horse in the race. While Schawlow proclaimed that ruby could never make a laser, Maiman slowly convinced himself it would. As others struggled with recalcitrant equipment and military secrecy, Maiman built a tiny and elegant device that fit in the palm of his hand. His ruby laser worked the first time he tried it on May 16, 1960, but afterwards he had to battle for acceptance as the man who made the first laser. **Beam** is a fascinating tale of a remarkable and powerful invention that has become a symbol of modern technology.

**Nico Bloembergen** Rob Herber, 2019-11-25 This biography is a personal portrait of one of the best-known Dutch physicists. Nicolaas Bloembergen was born in 1920 in Dordrecht. Bloembergen studied physics in Utrecht, leaving after World War II for the United States where he became an American citizen in 1958. At Harvard University he pioneered nuclear magnetic resonance (NMR) used in chemistry and biology for structure identification, moreover leading to MRI, laser theory, and nonlinear optics. In 1978 he was awarded the Lorentz Medal for his contribution to the theory of nonlinear optics used in fiber optics, and in 1981 he received the Nobel Prize for physics along with Arthur Schawlow and Kai Siegbahn. The book is based on numerous conversations with Nicolaas Bloembergen himself, his wife Deli Brink, his family, and colleagues in science. It describes his childhood and study in Bilthoven and Utrecht, the first postwar years at Harvard, the discoveries of masers and lasers, and the award of the Nobel Prize. It also delves into Bloembergen's involvement in American politics, particularly his role in Ronald Reagan's controversial Star Wars program.

**Beam Weapons** Jeff Hecht, 1984-03-31 **Beam Weapons** examines the directed energy weapons that became a central part of the Reagan Administration's Strategic Defense Initiative, better known as Star Wars. First published in 1984, it describes the science and technology behind directed energy weapons, the state of the art at the time Reagan launched the program, and the military issues involved. The first full-length book published on the topic, it exhaustively documents the technical and military realities and uncertainties.

**Understanding Lasers** Jeff Hecht, 2011-09-20 Updated to reflect advancements since the publication of the previous edition, **Understanding Lasers: An Entry Level Guide**, 3rd Edition, is an introduction to lasers and associated equipment. You need only a minimal background in algebra to understand the nontechnical language in this book, which is a practical, easy-to-

Maiman, 2017-12-21 In these engaging memoirs of a maverick Theodore H Maiman describes the life events leading to his invention of the laser in 1960 Maiman succeeded using his expertise in physics and engineering along with an ingenious and elegant design not anticipated by others His pink ruby laser produced mankind's first ever coherent light and has provided transformational technology for commerce industry telecom the Internet medicine and all the sciences Maiman also chronicles the resistance from his employer and the ongoing intrigue by competing researchers in industry and academia seeking to diminish his contribution in inventing the first laser This work will appeal to a wide readership from physicists and engineers through science enthusiasts to general readers The volume includes extensive photos and documentary materials related to Maiman's life and accomplishments never before published No one beat Maiman to the laser How important is the laser How important are all lasers That is how important we have to regard Maiman's contribution He and the laser changed all of our lives everyone's Dr Nick Holonyak Jr Professor of Electrical and Computer Engineering and Physics University of Illinois at Champaign Urbana and inventor of the light emitting diode LED and co inventor of the transistor laser More than five decades later we can safely conclude that Theodore Maiman's groundbreaking discovery changed the world Our modern life just as scientific research would be quite different without the laser Dr Ferenc Krausz Director Max Planck Institute for Quantum Optics Garching Germany and Professor of Physics Ludwig Maximilian University Munich and pioneer in attosecond lasers and attophysics Maiman had the stroke of genius needed to take a different approach from his competitors The sheer elegance and simplicity of his design belies the intellectual achievement it represents If his invention seems obvious to some today it was far from obvious in 1960 Jeff Hecht authoritative science writer on the historical development of the laser author of books on lasers and fiber optics     Textbook on Cutaneous and Aesthetic Surgery Mysore
