Christopher D Armstrong,2018-11-02 The last ten years have seen explosive growth in the technology available to the
collision analyst changing the way reconstruction is practiced in fundamental ways The greatest technological advances for
the crash reconstruction community have come in the realms of photogrammetry and digital media analysis The widespread
use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data create 3D
models and visualize and analyze crash vehicles and environments The introduction of unmanned aerial systems and
standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst
to visualize and model the components of a crash reconstruction Because of the technological changes occurring in the
industry many SAE papers have been written to address the validation and use of new tools for collision reconstruction
Collision Reconstruction Methodologies Volumes 1 12 bring together seminal SAE technical papers surrounding
advancements in the crash reconstruction field Topics featured in the series include Night Vision Study and Photogrammetry
