*Making Space* John Rennie Short, 2004-03-01 The cosmos was bound in a sphere the world was gridded and plotted the seas navigated and the land surveyed Spatial practices were codified a spatial sensitivity was created and a cartographic literacy was established in the increasing use of maps and the creation of a cartographic language for new mappings of the world state and city Short establishes that such spatial revisioning is connected to the promotion of commercial and national interests Developments in navigation for example were often encouraged and promoted both by the state and by merchant companies Surveying was closely connected to the rising cost of land and to the increasing commodification of agriculture The continuous price rise of land in the sixteenth century was an important factor in the rise of spatial practices of mapping and surveying In addition he highlights the role of the occult practices in the new spatial sciences Astrology and alchemy were as important as astronomy and geometry The cosmographers of the sixteenth century encompassed a wide arc of intellectual endeavors

*Symbolic Home: Exploring ancient feng shui roots for contemporary practice* Sofia Batalha, 2020-05-23 Have you ever heard of Feng Shui but everything you read seems confusing and contradictory You don't know how to go from theory to practice and there are rules that are abstract and random to you You've never heard of Feng Shui but do you feel the Home is more than just four walls The Symbolic Home Feng Shui Practice The Symbolic Feng Shui method is based on the millenary concepts of Feng Shui adapted to the here and now A method that allows one to see and feel the Home far beyond its form function giving it an emotional and symbolic dimension In this way each division is an individual spatial identity with its own symbology structure and emotions The book serves as a starting point for a full and conscious experience of private space Start changing today

**Frontiers of Femininity** Karen M. Morin, 2008-12-18 British explorer and professional travel writer Isabella Bird is to the modern eye a study in contradictions One of the premier mountaineers and world explorers of her generation she was in 1892 the first woman elected to London's Royal Geographic Society And yet Bird's books on her travels are filled with depictions of herself and other women that reinforce the properly feminine domestic and behavioral codes of her day In this fascinating and highly original collection of essays Karen Morin explores the self expression of travel writers like Bird by giving geographic context to their work With a rare degree of clarity the author examines relationships among nineteenth century American expansionism discourses about gender and writings of women who traveled and lived in the American West in the late nineteenth century British travelers American journalists a Native American tribal leader and female naturalists

Drawing from a rich diversity of primary sources from published travelogues and unpublished archival sources such as letters and diaries to newspaper reportage Morin considers ways in which women's writing was influenced by the material circumstances of travel in addition to the various social norms that circumscribed female roles Ranging in scale from the interior of train cars and the homes of these women to the colonial projects of conquering the American West the author illustrates how geography was fundamental to the formation of women's identity and greatly influenced the gendered and colonialist language found in their writing

**Green Syndicalism** Jeff Shantz,2012-10-10 It is widely understood that the burdens of ecological destruction are borne disproportionately by working class and poor communities both through illness and disease caused by pollutants and through the depletion of natural resources from which they make a living Yet consistently the voices of the working class are the most marginalized excluded and silenced when discussing how to address ecological concerns and protect the environment from future destruction Both mainstream environmental groups such as the Sierra Club and Greenpeace and radical environmentalists such as EarthFirst are reluctant to engage with working class and poor communities often viewing blue collar workers as responsible for the destruction these groups are trying to prevent In Green Syndicalism Shantz issues a call to action to the environmental movement and labor activists particularly rank and file workers to join forces in a common struggle to protect the environment from capitalism corporate greed and the extraction of resources He argues for a major transformation to address the jobs versus the environment rhetoric that divides these two groups along lines of race and class Combining practical initiatives and theoretical perspectives Shantz offers an approach that brings together radical ecology and revolutionary unionism in a promising vision of green politics Green syndicalists work as coalitions to increase community based economics and productive decision making that encourages the participation of all stakeholders in the process Drawing in part on his own experiences growing up in a working class family and organizing within radical ecology and labor movements Shantz charts a path that accesses the commonalities between these groups in an effort to take on the forces that destroy the environment exploit people and harm their communities
