## **Atheist Awakening Secular Activism And Community In America:**

*Atheist Awakening* Richard P. Cimino, Christopher Smith, 2014 *Atheist Awakening* is a groundbreaking study of the growth and revitalization of the atheist movement in the U S Through in depth interviews and observation of atheist gatherings the authors find that much of this awakening has come about as atheists have engaged in new forms of activism and community building The book portrays a new atheism one that has revised strategies to wage a powerful defensive and offensive battle against their ideological and political antagonists

**Atheist Awakening** Reed Stemple, 2021-04 *Atheism Atheist Organizations and Activism* What are the main beliefs of atheism Why secular humanism can do what atheism can t what is the difference between an atheist and secular humanism This study shows how their judiciary battles ensured the clarification and galvanization of the First Amendment s Establish Clause how they challenged the Protestant domination of government institutions and helped to reveal a schism within Protestant churches between progressive and conservative factions

*Organized Secularism in the United States* Ryan T. Cragun, Christel Manning, Lori L. Fazzino, 2017-11-07 There has been a dramatic increase in the percentage of the US population that is not religious However there is to date very little research on the social movement that is organizing to serve the needs of and advocate for the nonreligious in the US This is a book about the rise and structure of organized secularism in the United States By organized secularism we mean the efforts of nonreligious individuals to build institutions networks and ultimately a movement that serves their interests in a predominantly religious society Researchers from various fields address questions such as What secularist organizations exist Who are the members of these organizations What kinds of organizations do they create What functions do these organizations provide for their members How do the secularist organizations of today compare to those of the past And what is their likely impact on the future of secularism For anyone trying to understand the rise of the nonreligious in the US this book will provide valuable insights into organized efforts to normalize their worldview and advocate for their equal treatment in society

Political Religion and Religious Politics David S. Gutterman, Andrew R. Murphy, 2015-10-14 Profound demographic and cultural changes in American society over the last half century have unsettled conventional understandings of the relationship between religious and political identity The Protestant mainline continues to shrink in numbers as well as in cultural and political influence The growing population of American Muslims seek both acceptance and a firmer footing within the nation s cultural and political imagination Debates over contraception same sex relationships and prosperity preaching continue to roil the waters of American cultural politics Perhaps most remarkably the fastest rising religious demographic in most public opinion surveys is none giving rise to a new demographic that Gutterman and Murphy name Religious Independents Even the evangelical movement which powerfully re entered American politics during the 1970s and 1980s and retains a strong foothold in the Republican Party has undergone generational turnover and no longer represents a monolithic political bloc *Political Religion and Religious Politics Navigating Identities in the United States* explores the

multifaceted implications of these developments by examining a series of contentious issues in contemporary American politics Guttermann and Murphy take up the controversy over the Ground Zero Mosque the political and legal battles over the contraception mandate in the Affordable Health Care Act and the ensuing Supreme Court Hobby Lobby decision the national response to the Great Recession and the rise in economic inequality and battles over the public school curricula seizing on these divisive challenges as opportunities to illuminate the changing role of religion in American public life Placing the current moment into historical perspective and reflecting on the possible future of religion politics and cultural conflict in the United States Guttermann and Murphy explore the cultural and political dynamics of evolving notions of national and religious identity They argue that questions of religion are questions of identity personal social and political identity and that they function in many of the same ways as race sex gender and ethnicity in the construction of personal meaning the fostering of solidarity with others and the conflict they can occasion in the political arena

*Back-Pocket God* Melinda Lundquist Denton,Richard W. Flory,2020 More than a decade ago a group of researchers began to study the religious and spiritual lives of American teenagers They tracked these young people over the course of a decade revisiting them periodically to check in on the state and future of religion in America and reporting on their findings in a series of books beginning with *Soul Searching* 2005 Now with *Back Pocket God* this mammoth research project comes to

its conclusion What have we learned about the changing shape of religion in America Back Pocket God explores continuity and change among young people from their teenage years through the latter stages of emerging adulthood Melinda Lundquist Denton and Richard Flory find that the story of young adult religion is one of an overall decline in commitment and affiliation and in general a moving away from organized religion Yet there is also a parallel trend in which a small religiously committed group of emerging adults claim faith as an important fixture in their lives Emerging adults don't seem so much opposed to religion or to religious organizations at least in the abstract as they are uninterested in religion at least as they have experienced it Religion is like an app on the ubiquitous smartphones in our back pockets readily accessible easy to control and useful but only for limited purposes Denton and Flory show that some of the popular assumptions about young people and religion are not as clear as what many people seem to believe The authors challenge the characterizations of religiously unaffiliated emerging adults sometimes called religious nones as undercover atheists At the other end of the spectrum they question the assumption that those who are not religious will return to religion once they marry and have children

**Blurred Boundaries and Deceptive Dichotomies in Pre-Modern Texts and Images** Dafna Nissim, Vered Tohar, 2023-12-18 This collection of essays focuses on the way blurred boundaries are represented in pre modern texts and visual art and how they were received and perceived by their audiences readers listeners and viewers According to the current understanding that opposing cognitive categories that are so common in modern thinking do not apply to pre modern mentalities we argue that individuals in medieval and pre modern societies did not necessarily consider sacred and secular male and female real and fictional and opposing emotions as absolute dichotomies The contributors to the present collection examine a wide range of cultural artifacts literary texts wall paintings sculptures jewelry manuscript illustrations and various objects as to what they reflect regarding the dominant perceptual system the network of beliefs worldviews presumptions values and norms of viewing reading hearing different from modern epistemology strongly predicated on the binary nature of things and people The essays suggest that analyzing pre modern cultural works of art or literature in light of reception theory can lead to a better understanding of how those cultural products influenced individuals and impacted their thoughts and actions

**Truth Claims in a Post-Truth World** Erkan Ali, 2023-08-18 Drawing on debates from a multi disciplinary perspective this book examines what it means to offer a genuine sociological critique of religious faith illiberalism and anti secularism from a macro perspective Arguing that as a discipline concerned with real issues in the social world sociology should be at the forefront of any analysis of religious power and legitimacy the author contends that much religious faith is fundamentally incompatible with any twenty first century society that seeks inclusive utilitarian and humanistic principles as its goals With an emphasis on sociology the effects of organised religion's overall decline in modern Western contexts are explored while the troubling re emergence or persistence of faith based and other non evidentiary perspectives is also discussed via debates around identity politics postmodernism and multiculturalism Through an analysis of the rise of

irrational thinking in our politics and our entire social and cultural fabric the book moves to conclude that religious beliefs and other forms of dogmatism are underpinned by powerful influential and potentially dangerous ideological structures at various levels of society and that viable secular alternatives to faith teachings ought to be nurtured in their place A critique of religion that advances modern secular humanistic thought Truth Claims in a Post Truth World will appeal to scholars of sociology social theory and philosophy with interests in religion political thought ethics and civil society

*Unholy Catholic Ireland* Hugh Turpin, 2022-09-13 There are few instances of a contemporary Western European society more firmly welded to religion than Ireland is to Catholicism For much of the

twentieth century to be considered a good Irish citizen was to be seen as a good and observant Catholic Today the opposite may increasingly be the case The Irish Catholic Church once a spiritual institution beyond question is not only losing influence and relevance in the eyes of many it has become something utterly desacralized In this book Hugh Turpin offers an innovative and in depth account of the nature and emergence of ex Catholicism a new model of the good and secular Irish person that is being rapidly adopted in Irish society Using rich quantitative and qualitative research methods Turpin explains the emergence and character of religious rejection in the Republic He examines how numerous factors including economic growth social liberalization attenuated domestic religious socialization the institutional scandals and moral collapse of the Church and the Church s lingering influence in social institutions and laws have interacted to produce a rapid growth in ex Catholicism By tracing the frictions within and between practicing Catholics cultural Catholics and ex Catholics in a period of profound cultural change and moral reckoning Turpin shows how deeply the meanings of being religious or non religious have changed in the country once described as Holy Catholic Ireland

#### **Annual Review of the Sociology of Religion.**

**Volume 7 (2016)** Roberto Cipriani,Franco Garelli,2016-06-27 Recent studies show that atheism is increasing The reasons for this development have not as yet been examined thoroughly Many atheists continue to be residual groups in surveys on religiosity making it difficult to examine who they are and why they have chosen to be atheists Moreover they are minority groups in most countries former Soviet bloc countries are left out of discussion many do not identify with any organized groups of atheists or agnostics Atheist groups and ideologies then represent a wide range of attitudes behaviour and ways of acting towards religion The lack of a clear definition of what being atheist or an unbeliever means today invites us to study the issue in greater depth This volume represents a first attempt at understanding and scrutinizing atheism Thanks to all contributors it provides both a global perspective and specific insights into specific cases

**Why Baby Boomers Turned from Religion** Abby Day,2022 *Why Baby Boomers Turned from Religion* takes an in depth look at the generation of post WWII babies who came of age in the 1960s and how they acted as a transitional

generation between religious parents and non religious children and grandchildren forged different practices and sites of meaning morality community and transcendence      Enthusiasm Monique Scheer,2021-01-01 Enthusiasm seeks to contribute to a culturally and historically nuanced understanding of how emotions secure and ratify the truth of convictions More than just pure affective intensity enthusiasm is about something a certainty clarity or truth Neither as clearly negative as fanaticism nor as general as passion enthusiasm specifically entails belief For this reason the book takes its starting point in religion the social arena in which the concept was first debated and to which the term still gestures Empirically based in modern German Protestantism where religious emotion is intensely cultivated but also subject to vigorous scrutiny it combines historical and ethnographic methods to show how enthusiasm has been negotiated and honed as a practice in Protestant denominations ranging from liberal to charismatic The nexus of religion and emotion and how it relates to central concepts of modernity such as rationality knowledge interiority and sincerity are key to understanding why moderns are so ambivalent about enthusiasm Grounded in practice theory Enthusiasm assumes that emotions are not an affective state we have but mind body activations we do having learned to perform them in culturally specific ways When understood as an emotional practice enthusiasm has different styles inflected by historical traditions social milieus and knowledge even ideologies about emotions and how they work Enthusiasm also provides insight into how this feeling works in secular humanism as well as in politics and why it is so contested as a practice in any context      *American Trinity* Larry Len Peterson,2017-09-11 American Trinity is for everyone who loves the American West and wants to learn more about the good the bad and the ugly It is a sprawling story with a scholarly approach in method but accessible in manner In this innovative examination Dr Larry Len Peterson explores the origins development and consequences of hatred and racism from the time modern humans left Africa 100 000 years ago to the forced placement of Indian children on off reservation schools far from home in the late 1800s Along the way dozens of notable individuals and cultures are profiled Many historical events turned on the lives of legendary Americans like the Father of the West Thomas Jefferson and the Son of the West George Armstrong Custer two strange companions who shared an unshakable sense of their own skills as their interpretation of truths motivated them in the winning of the West Dr Peterson reveals how anti Indian sentiments were always only obliquely about them They were victims but not the cause The Indian was a symbol not a real person The politics of hate and racism directed toward them was also experienced in prior centuries by Jews enslaved Africans and other Christians Hatred and racism when taken into the public domain are singularly difficult to justify which is why Europeans and Americans have always sought vindication from the highest sources of authority in their cultures In the Middle Ages it was religion supplemented later by the philosophy of the Enlightenment In nineteenth century Europe and America religion and philosophy were joined by science and medicine to support Manifest Destiny scientific racism and social Darwinism all of which had profound consequences on Native Americans and the Spirit of the West Presenting research in anthropology archaeology biology

history law medicine religion philosophy and psychology Dr Peterson provides the latest observations that delineate why the Native American s life was destroyed American Trinity is a stunning portrait a view at once unique panoramic and intimate It is a fascinating book that will make you think about the differences between belief and knowledge about the self skepticism of science and medicine and about what aspects of the world we take on faith **The Oxford Handbook of Secularism**
