were produced and the traffic in single recipes copied from them Especially important for historians of the book and the Christian Bible are new insights in the historical shift from roll to codex complicated methods of inscribing the bilingual papyri in which the Greek script is written left to right and the demotic script right to left and the new realization that several of the longest extant handbooks are clearly compilations of two or more shorter handbooks which may have come from different places The essays also reexamine and rethink the idea that these handbooks came from the personal libraries of practicing magicians or temple scriptoria in one case going so far as to suggest that two of the handbooks had literary pretensions of a sort and were designed to be read for pleasure rather than for quotidian use in making magical recipes
