Suffering Time: Philosophical, Kabbalistic, and Hasidic Reflections on Temporality Elliot R. Wolfson, 2021-05-25

No one theory of time is pursued in these essays but a major theme that threads them together is Wolfson's signature idea of the timeswerve as a linear circularity or a circular linearity expressions that are meant to avoid the conventional split between the two temporal modalities of the line and the circle The conception of time elicited by Wolfson from a host of philosophical and mystical sources both Jewish and non Jewish buttresses the contention that it is precisely structural invariability that engenders interpretive variation This hermeneutical axiom is justified in turn by the presumption regarding the cadence of time as the constant return of what has always been what is yet to be The telling of time wells forth from the time of telling One cannot speak of the being of time consequently except from the standpoint of the time of being nor of the time of being except from the standpoint of the being of time
