Automated Driving in Japan and Germany Christine Eisenmann,Dennis Seibert,Torsten Fleischer,Ayako
 Taniguchi,Takashi Oguchi,2024-12-01 This open access book gives comprehensive empirical insights on connected and
 automated driving CAD of road transport vehicles which leads to the driver being partially or completely replaced by
 automation The current trend towards widespread research and development of automation of motorised individual transport
 is driven by the expected benefits such as increased road safety smoother traffic flow reduction of congestion or use of
 driving time for other activities CAD has the potential to change several dimensions of the transport system ranging from
 changes in car ownership to the availability of entirely new mobility services Some proponents even expect CAD to
 revolutionise the current transport system as a whole In order to make informed statements about the possible impact of
 CAD on transport systems research must consider a wide range of open questions In what way do the existing framework
 conditions of the prevailing mobility systems affect the impact of CAD How does the governance style relate to regulatory
 changes and resource allocation in the development of CAD Is an autonomous ride hailing service really a profitable business
 case What are the attitudes and expectations towards CAD in the general public What are the effects of CAD on transport
 systems What are other impacts of CAD that should be assessed All of these questions were addressed within different
 projects as part of the Japanese German Research Cooperation on CAD and can be discovered by the reader of this book
Official Gazette of the United States Patent Office United States. Patent Office,1899 *Safety Impacts of Active Safety*
and Driving Automation Features Jeffrey Wishart,2025-08-13 Advanced technologies that assist the human driver or reduce
 or even eliminate the human driver s role are becoming increasingly prevalent in new light duty vehicles used by the general
 public These technologies are divided between Active Safety features that monitor the human driver and vehicle motion and
 act intermittently to mitigate and avoid crashes and Driving Automation features that assume some or all of the dynamic
 driving task from the human driver Both types of technologies have the potential to reduce injuries and save lives by
 reducing the frequency and or severity of crashes Safety Impacts of Active Safety and Driving Automation Features
 addresses the current capabilities and future potential for Active Safety and Driving Automation features to reduce crash
 frequency and severity and provides an overview of the state of the industry for both types of features including current
 deployments trends and anticipated rollouts Gaps in knowledge unsettled issues and suggestions for future research will also
 be discussed ISBN 9781468609752 9781468609769 DOI <https://doi.org/10.4271/EPR2025013> Synthetics, Mineral Oils,
