**Architecture and Freedom** Owen Hopkins, 2018-05-29 Architects are facing a crisis of agency For decades they have seen their traditional role diminish in scope as more and more of their responsibilities have been taken over by other disciplines within the building construction industry Once upon a time we might have seen the architect as the conductor of the orchestra now he or she is but one cog in a vast and increasingly complex machine In an attempt to find a way out of this crisis there is growing debate about how architects might reassert the importance of their role and influence On one side of this argument are those who believe that architects must refocus their attention on the internal demands of the discipline On the other are those who argue that architects must instead reacquaint themselves with what many still believe to be the discipline s core mission of advancing social progress and promoting the public good and at

the same time the scope of their traditional disciplinary remit At root this question is fundamentally about freedom about whether architects still possess it if they have ever done and whether it is possible to find the professional disciplinary and individual autonomy to be able to define the spheres of their own practice Presenting a variety of views and perspectives this issue of AD takes us to the heart of what freedom means for architecture as it adapts and evolves in response to the changing contexts in which it is practised in the 21st century Contributors include Phillip Bernstein Peggy Deamer Adam Nathaniel Furman Kate Goodwin Charles Holland Anna Minton Patrik Schumacher Alex Scott Whitby Ines Weizman and Sarah Wigglesworth Featured architects Atelier Kite ScottWhitbyStudio C S Architects Anupama Kundoo Noero Architects Umbrellium and Zaha Hadid Architects

*Libraries of Light* Alistair Black,2016-10-04 For the first hundred years or so of their history public libraries in Britain were built in an array of revivalist architectural styles This backward looking tradition was decisively broken in the 1960s as many new libraries were erected up and down the country In this new Routledge book Alistair Black argues that the architectural modernism of the post war years was symptomatic of the age s spirit of renewal In the 1960s public libraries truly became libraries of light and Black further explains how this phrase not only describes the shining new library designs with their open plan decluttered Scandinavian inspired designs but also serves as a metaphor for the public library s role as a beacon of social egalitarianism and cultural universalism A sequel to *Books Buildings and Social Engineering* 2009 Black s new book takes his fascinating story of the design of British public libraries into the era of architectural modernism
