The Rubato Composer Music Software Gérard Milmeister, 2009-04-05 Both modern mathematical music theory and computer science are strongly influenced by the theory of categories and functors One outcome of this research is the data format of denotators which is based on set valued presheaves over the category of modules and diaffine homomorphisms The functorial approach of denotators deals with generalized points in the form of arrows and allows the construction of a universal concept architecture This architecture is ideal for handling all aspects of music especially for the analysis and composition of highly abstract musical works This book presents an introduction to the theory of module categories and the theory of denotators as well as the design of a software system called Rubato Composer which is an implementation of the category theoretic concept framework The application is written in portable Java and relies on plug in components so called rubettes which may be combined in data flow networks for the generation and manipulation of denotators The Rubato Composer system is open to arbitrary extension and is freely available under the GPL license It allows the developer to build specialized rubettes for tasks that are of interest to composers who in turn combine them to create music It equally serves music theorists who use them to extract information from and manipulate musical structures They may even develop new theories by experimenting with the many parameters that are at their disposal thanks to the increased flexibility of the functorial concept architecture Two contributed chapters by Guerino Mazzola and Florian Thalmann illustrate the application of the theory as well as the software in the development of compositional tools and the creation of a musical work with the help of the Rubato framework

Architecture and the Historical Imagination Martin Bressani,2016-04-15 Hailed as one of the key theoreticians of modernism Eug ne Emmanuel Viollet le Duc was also the most renowned restoration architect of his age a celebrated medieval archaeologist and a fervent champion of Gothic revivalism He published some of the most influential texts in the history of modern architecture such as the Dictionnaire raisonn de l architecture fran aise du XIe au XVIe si cle and Entretiens sur l architecture but also studies on warfare geology and racial history Martin Bressani expertly traces Viollet le Duc s complex intellectual development mapping the attitudes he adopted toward the past showing how restoration in all its layered meaning shaped his outlook Through his life journey we follow the route by which the technological subject was born out of nineteenth century historicism

Visual Theology of the Huguenots Randal Carter Working,2017-02-23 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have investigated in depth the relationship between Reformed theology and architectural forms In The Visual Theology of the Huguenots Randal Carter Working explores the roots of Reformed aesthetics set against the background of late medieval church architecture Indicating how demonstrably important the work of Serlio is in the spreading of the ideas of Vitruvius Working explains the influence of classical Roman building on French Reformed architecture He follows this with an examination of five important Huguenot architects Philibert de l Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret The distinct language of Huguenot architecture is revealed by his comparative analysis of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings demonstrate how the contribution of Huguenot architecture gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Architecture in the Age of Mediatizing

Technologies Sang Lee,2024-10-31 This book offers a novel perspective on contemporary architecture exploring its position in mediatization attained through technological apparatuses It introduces the novel concepts of apparatus centricity and mediatization of architecture which have significant disciplinary and cultural ramifications Highlighting key technological and theoretical developments the book s narrative traces the transformation of architecture from the modernist era to the present digital age En route it reflects on how architecture becomes a crucial element of shifting dispositives through its confluence with technologies of aestheticization and virtualization and by emblemizing ecological ideals It also illuminates the reconfiguring of architectural practice through examining surprising interactions and analogies between architecture and music whose developments in notation and codification continually change the relationship between composer and performer The book explores how architecture is reshaped by broader theory and practice in media and ultimately serves as

a cognitive agent It underscores that architecture profoundly influences our phantasmagoric image driven affective world through its increasingly apparatus centric approach to conception design production and mediatization Architecture in the Age of Mediatizing Technologies brings into focus the behavior of architecture in mediatization for researchers and advanced students in architectural design theory and history As an investigation into the interdisciplinary impact of architecture in a mediatized culture at large it also provides a valuable resource for cultural and media studies
