Architecture Without Architects Arts Council of Great Britain, International Council of the Museum of Modern Art (New York, N.Y.), 1975 **Architecture Without Architects** Bernard Rudofsky, 1954 *Architecture Without Architects* Hansen Sentosa, 2020 This portfolio is a manifestation of an ongoing investigation of understanding the agency of architecture in our current built environment Through illustrations and writings I elaborated my research and understanding of architecture in the area of my TI Territory of Investigation Architecture and Discourse It mainly consists of two different studio explorations ARCH 7712 Rational Form Making ARCH 7113 Universum Carrousel Journey and elective courseworks related to my Territory of Investigations ARCH 6308 Shinohara Kazuo and Contemporary Arch in Japan ARCH 6408 Robots Cyborgs and Architecture ARCH 6408 PhotoArch Collective Fictions ARCH 6309 Principles Theories and Elements in Japanese Architecture and Gardens In the research I attempt to challenge the idealistic role of architects in defining the future of our built environment With the advancement of technology methods of building and materials in this postmodernism era certain changes inventions and evolution of styles are inevitable The title *Architecture Without Architects* summarizes the modern trend where the essence of architecture is often neglected and overcome by aesthetic ego and power A phenomenon that leads us to the question of to what degree is the role of vernacular architecture transpiring in this 21st century when glass and steel towers proliferate and the homogeneity of urban fabric increases Therefore in this research I would like to explore how architects can adopt the essence of vernacular architecture while still maintaining the integrity and aspects of post modern architecture The research is concluded with comprehensive illustrations and supplemental materials of my work to support the respective investigation *Introducing Architectural Theory* Korydon Smith, Miguel Guitart, 2024-01-22 Building on the success of the first edition an engaging and reader friendly work on complex ideas *Introducing Architectural Theory* Expanding the Disciplinary Debate broadens the range of themes voices and geographies represented to provide a more comprehensive and contemporary theory book This book presents major discourses in architectural theory and design in a debate like format integrating a series of edited texts across architectural history with context and newly written commentaries by the authors This new edition has been fully revised updated and expanded to include long standing debates

such as simplicity vs complexity or the relationship between form and function as well as newer discussions on innovation globalization and social equity Authors Smith and Guitart provide a comprehensive means and conceptual framework for readers to compare multiple points of view The chapter structure discussion questions and additional resources allow teachers to facilitate in class discussions and writing assignments This book remains the most accessible architectural theory textbook written for beginning architecture students and those outside the discipline Its reflective and critical approach will equally engage the minds of upper level students and experts

**Learning from Vernacular** Pierre Frey, 2010 In 1964 Bernard Rudofsky curated the exhibition Architecture Without Architects at The Museum of Modern Art in New York thereby drawing the attention of the postwar Western public to traditional architectures rescuing them from the ignominy to which they had been consigned by the national ideologies of Europe in the 1930s In the early 1980s Ivan Illich published a number of radical critiques of modernity in which he drew attention to vernacular values proposing a trenchant but hospitable definition of this term It derives from Roman law in which everything produced within the household for consumption within the household and not for sale or exchange is vernacular In order to locate this proposition within the field of architectural criticism this book borrows with ironic intent part of the title of Robert Venturi's celebrated work Learning from Las Vegas 1977 which launched the fashion for post modernism in architecture Taking advantage of a collection of maquettes of vernacular architecture the only one of its kind in the world whose special attributes he highlights and whose value he underlines the author selects contemporary realisations by architects from Africa Asia America and Europe that seem to him to constitute a new vernacular architecture The emphasis here is on materials available on the fringes of the market on the safeguarding and development of traditional know how on the social role of the architect and on the teaching of architecture

A World History of Architecture Marian Moffett, Michael W. Fazio, Lawrence Wodehouse, 2003 The Roman architect and engineer Vitruvius declared firmitas utilitas and venustas firmness commodity and delight to be the three essential attributes of architecture These qualities are brilliantly explored in this book which uniquely comprises both a detailed survey of Western architecture including Pre Columbian America and an introduction to architecture from the Middle East India Russia China and Japan The text encourages readers to examine closely the pragmatic innovative and aesthetic attributes of buildings and to imagine how these would have been praised or criticized by contemporary observers Artistic economic environmental political social and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients society at large and future generations
