Sense of Agency: Examining Awareness of the Acting Self
Nicole David,James W Moore,Sukhvinder Obhi,2015-07-24 The sense of agency is defined as the sense of oneself as the agent of one s own actions This also allows oneself to feel distinct from others and contributes to the subjective phenomenon of self consciousness Gallagher 2000 Distinguishing oneself from others is arguably one of the most important functions of the human brain Even minor impairments in this ability profoundly affect the individual s functioning in society as demonstrated by psychiatric and neurological syndromes involving agency disturbances Della Sala et al 1991 Franck et al 2001 Frith 2005 Sirigu et al 1999 But the sense of agency also plays a role for cultural and religious phenomena such as voodoo superstition and gambling in which individuals experience subjective control over objectively uncontrollable entities Wegner 2003 Furthermore it plays into ethical and law questions concerning responsibility and guilt For these reasons a better understanding of the sense of agency has been important for neuroscientists clinicians philosophers of mind and the general society alike Significant progress has been made in this regard For example philosophical scrutiny has helped establish the conceptual boundaries of the sense of agency Bayne 2011 Gallagher 2000 2012 Pacherie 2008 Synofzik et al 2008 and scientific investigations have shed light on the neurocognitive basis of sense of agency including the brain regions supporting sense of agency Chambon et al 2013 David et al 2007 Farrer et al 2003 2008 Spengler et al 2009 Tsakiris et al 2010 Yomogida et al 2010 Despite this progress there remain a number of outstanding questions such as Are there cross cultural differences in the sense of agency How does the sense of agency develop in infants or change across the lifespan How does social context influence sense of agency What neural networks support sense of agency i e connectivity and communication between brain regions What are the temporal dynamics with respect to neural processes underlying the sense of agency i e the what and when of agency processing How can different cue models of the sense of agency be further specified and empirically supported especially with regards to cue integration weighting What are the applications of sense of agency research clinically engineering etc The concept of the sense of agency offers intriguing avenues for knowledge transfer across disciplines and interdisciplinary empirical approaches especially in addressing the afore mentioned outstanding questions The aim of the present research topic is to promote and facilitate such interdisciplinarity for a better understanding of why and how we typically experience our own actions so naturally and undoubtedly as ours and what goes awry when we do not We thus welcome contributions from for example i neuroscience and psychology including development psychology neuroscience ii psychiatry and neurology iii philosophy iv robotics and v computational modeling In addition to empirical or scientific studies of the sense of agency we also encourage theoretical contributions including reviews models and opinions

Physically Based Real-Time Auralization of Interactive Virtual Environments Dirk Schröder, 2011

Analogous to visualization the auralization of virtual environments describes the simulation of sound propagation inside enclosures where methods of Geometrical Acoustics are mostly applied for a high quality synthesis of aural stimuli that go along with a certain realistic behavior In the course of this thesis the design and implementation of the real time room acoustics simulation software RAVEN will be described which is a vital part of the implemented 3D sound rendering system of RWTH Aachen University s immersive Virtual Reality system RAVEN relies on present day knowledge of room acoustical

simulation techniques and enables a physically accurate auralization of sound propagation in complex environments including important wave effects such as sound scattering airborne sound insulation between rooms and sound diffraction. Despite this realistic sound field rendering not only spatially distributed and freely movable sound sources and receivers are supported at runtime but also modifications and manipulations of the environment itself. All major features are evaluated by investigating both the overall accuracy of the room acoustics simulation and the performance of implemented algorithms and possibilities for further simulation optimizations are identified by assessing empirical studies of subjects operating in immersive environments.

Federal Register, 2008-03 [The Pearson CSAT Manual 2012](#) Edgar Thorpe, 2012 *Engaging with Australasia: Comparative Research on ELT and English Teacher Education* Raqib Chowdhury, Huynh Anh Tuan, 2024-10-21

The book showcases collaborative intercultural research into English language teaching and English language teacher education across Australasia covering a broad range of topics from English education policies curricular reform and practices teacher professional development and teacher and student identities. Together the selected studies showcase how in the shadow of the Pandemic newer configurations in developing Asian and South East Asian countries have complicated collaboration in teaching and research and how these contrast with practices in Australia. In particular the studies highlight the need for both cultural and pedagogical adaptations in practitioners engagement with both policy and pedagogy. The book finds interested readership among emerging educators including graduate and doctoral researchers as well as educators and policymakers.
