**Philosophical Methodology: The Armchair or the Laboratory?** Matthew C. Haug, 2013-07-31 What methodology should philosophers follow Should they rely on methods that can be conducted from the armchair Or should they leave the armchair and turn to the methods of the natural sciences such as experiments in the laboratory Or is this opposition itself a false one Arguments about philosophical methodology are raging in the wake of a number of often conflicting currents such as the growth of experimental philosophy the resurgence of interest in metaphysical questions and the use of formal methods This outstanding collection of specially commissioned chapters by leading international philosophers discusses these

questions and many more It provides a comprehensive survey of philosophical methodology in the most important philosophical subjects metaphysics epistemology philosophy of language philosophy of mind phenomenology philosophy of science ethics and aesthetics A key feature of the collection is that philosophers discuss and evaluate contrasting approaches in each subject offering a superb overview of the variety of methodological approaches both naturalistic and non naturalistic in each of these areas They examine important topics at the heart of methodological argument including the role of intuitions and conceptual analysis thought experiments introspection and the place that results from the natural sciences should have in philosophical theorizing The collection begins with a fascinating exchange about philosophical naturalism between Timothy Williamson and Alexander Rosenberg and also includes contributions from the following philosophers Lynne Rudder Baker Matt Bedke Greg Currie Michael Devitt Matthew C Haug Jenann Ismael Hilary Kornblith Neil Levy E J Lowe Kirk Ludwig Marie McGinn David Papineau Matthew Ratcliffe Georges Rey Jeffrey W Roland Barry C Smith Amie L Thomasson Valerie Tiberius Jessica Wilson and David W Smith

*Kant's Transcendental Semantics* Zeljko Loparic, 2024-12-02 Kant's Transcendental Semantics is a translation of the most influential monograph on Kant published in Brazil one that launched the Semantic School in a country with a thriving tradition of Kant scholarship Zeljko Loparic differs from most interpreters of the Critique of Pure Reason in claiming that Kant's main aim is neither metaphysical nor epistemological nor methodological but semantic in asking for the conditions for meaning and reference of terms in order to justify the possibility of meaningful discourse of different types Loparic asks how our claims can have any meaning at all how they relate to actual and possible objects how our terms can ground scientific problem solving and what the truth conditions are for various kinds of statements that differ according to the grounds of their meaning and the targets of their reference Loparic argues for distinct uses for concepts of perception concepts of experience mathematical concepts pure concepts of the understanding the categories and the heuristic ideas of reason Because Kant's main worry in the Critique of Pure Reason is with the possibility of synthetic a priori judgments Loparic labels Kant's defense of those judgments a transcendental semantics
