Fourth Edition* Walter WHITE (Librarian to the Royal Society.), 1861** *Yorkshire Dialect in the Nineteenth Century* Paul Cooper, 2025-03-25 This book draws on a framework of enregisterment and indexicality to chart the ways in which the Yorkshire dialect came to be associated with particular linguistic repertoires and social stereotypes from the nineteenth century through to today Cooper situates the work within a historical enregisterment framework rooted in an ideological approach to the study of language Focusing on representations of the Yorkshire dialect in a corpus of nineteenth century writing comprising poetry ballads songs and plays Cooper explores how the dialect came to be enregistered and indexical of

social values such as friendliness directness or authenticity and how sub varieties impacted the division of communities along ideological lines The volume also includes qualitative analyses of metalinguistic commentary from such historical sources as dictionaries glossaries and magazines Taken together the book offers a holistic picture of the evolution of the Yorkshire dialect and in turn stereotypes of Yorkshireness which persist to this day Cooper shows how an enregisterment approach can offer a deeper understanding of the historical relationships between dialect and identity and in turn contemporary perceptions of dialects and their speakers This volume will be of interest to students and scholars in historical sociolinguistics dialectology and English language
