Yavneh Raz Kletter, Irit Ziffer, Wolfgang Zwickel, 2010 In the words of late Professor Moshe Kochavi the Philistine repository pit at Yavneh is the kind of discovery made only once every fifty years It is the richest repository pit ever found from Bronze and Iron Ages Israel Palestine containing thousands of cultic finds originating from a temple including an unprecedented number more than a hundred of cult stands so called architectural models carrying rich figurative art dozens of fire pans chalices and other objects The present volume includes the full publication of the excavation the stratigraphy the cult stands and the figures detached from cult stands several clay and stone altars and some pottery vessels related to burning of plant material most likely incense This exceptional book raises a host of highly important and intriguing questions Is this a favissa or even a genizah Why are many cult stands badly broken while some are intact were cult stands broken on purpose What is the explanation for the unique stratigraphy and for the layer of gray ash in the pit was fire kindled inside as part of a ritual How do we know that these finds are Philistine Are they part of the furniture of the temple or objects dedicated by worshippers as votives Do the figures on the cult stands represent mortal beings or divinities If divinities can we relate them with Biblical or extra biblical data on the gods of the Philistines What was the function s of cult stands Were they models of buildings supports for images offering tables altars or perhaps incense burners Why are female figures dominant while male figures are virtually absent In discussing such topics Yavneh I treats issues that are central to many fields of study religion and cult in Iron Age Israel Palestine the history and archaeology of the Philistines and their western relations Near Eastern iconography the meaning of

cult stands architectural models and the understanding of votive objects and of repository pits in general Literally salvaged from the teeth of a bulldozer these rare finds are now published Generations of scholars will discuss and reinterpret them there is no final word for such finds and hence this final excavation volume is not an end but a beginning Suggestions to Authors of the Reports of the United States Geological Survey Wallace R. deterioration Using such techniques scholars have been able to ascertain for example that sculptures previously thought to be modern works carved in the medieval manner were in fact completely authentic This innovative volume represents a watershed in the study of sculpture a collaborative dialogue between an art historian and a conservator between art history and art science that deepens our understanding of the object we see while illuminating its elusive enigmatic history From publisher s description **Applied Soils and Micromorphology in Archaeology** Richard I.
