The Mapmakers Wife By Robert Whitaker:

The Mapmaker's Wife Robert Whitaker, 2005 In 1735 a team of French scientists set out on a daring expedition into the South American wilderness to resolve one of the great scientific challenges of the time the precise size and shape of the Earth Scaling the Andes and journeying along the Amazon the mapmakers faced all manner of danger while madness disease and violent death each took their toll However one Jean Godin fell in love with a local girl called Isabel Grameson When the time came for the expedition to return to France Godin travelled ahead to ensure the way was safe for his new family But on reaching French Guiana disaster struck Spain and Portugal closed their borders and he was stranded unable to return to Isabel What followed lies at the core of this extraordinary tale a heartbreaking 20 year separation that ended when Isabel believing she might never see her husband again decided to make her own way across the continent a journey that began in hope but became hell on earth Drawing on his own experience retracing Isabel's epic trek as well as contemporary records Robert Whitaker recounts a captivating true story of love and survival set against the backdrop of what many still regard as the greatest expedition the world has ever known

The Mapmaker's Wife Robert Whitaker, 2008-11-05 In the early years of the 18th century a band of French scientists set off on a daring decade long expedition to South America in a race to measure the precise shape of the earth Like Lewis and Clark's exploration of the American West their incredible mission revealed the mysteries of a little known continent to a world hungry for discovery Scaling 16 000 foot mountains in the Peruvian Andes and braving jaguars pumas insects and vampire bats in the jungle the scientists barely completed their mission One was murdered another perished from fever and a third Jean Godin nearly died of heartbreak At the expedition's end Jean and his Peruvian wife Isabel Grameson became stranded at opposite ends of the Amazon victims of a tangled web of international politics Isabel's solo journey to reunite with Jean after their calamitous twenty year separation was so dramatic that it left all of 18th century Europe spellbound Her survival unprecedented in the annals of Amazon exploration was a testament to human endurance female resourcefulness and the power of devotion Drawing on the original writings of the French mapmakers as well as his own experience retracing Isabel's journey acclaimed writer Robert Whitaker weaves a riveting tale rich in adventure intrigue and scientific achievement Never before told *The Mapmaker's Wife* is an epic love story that unfolds against the backdrop of the greatest expedition the world has ever known

The Great Starvation Experiment Todd Tucker, 2007 Reprint Originally published New York Free Press c2006 **Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial

Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future. As scientific developments alter expectations for the future, the literature absorbs, uses, and adapts such contextual visions. The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences, including how fictional representations of science affect how we view its practice and disciplines. Although the main focus is on literature, other forms of science fiction, including film and video games, are explored, and because science is an international matter, works from non-English speaking countries are discussed as needed.

The Book Review Digest, 2004 **Discover**, 2004-07 **Covid-19** Janice M. Barlow, 2021-06-21

COVID 19: An America Changed looks back at the virus that transformed the world. Janice M. Barlow zeroes in on the day-to-day impact the virus has had on society, including debates about our response to the pandemic. She argues that some of the sticking points are old issues with new names, while others are new, especially for most of us who have never lived through a pandemic. Drawing on interviews of ill individuals as well as data from news reports, the author paints a detailed picture of how mandates were enforced, testing was conducted, and information and misinformation was circulated. She also shares her own experience of getting sick in early 2020 and not being sure of its cause. For weeks, she was exhausted and miserable. While God is not the focus of this monograph, it poses an important question that should be top of mind: Where will your heart be when you meet God on the other side?

A Day in a Working Life Gary Westfahl, 2015-04-21

Ideal for high school and college students studying history through the everyday lives of men and women, this book offers intriguing information about the jobs that people have held from ancient times to the 21st century. This unique book provides detailed studies of more than 300 occupations as they were practiced in 21 historical time periods ranging from prehistory to the present day. Each profession is examined in a compelling essay that is specifically written to inform readers about career choices in different times and cultures and is accompanied by a bibliography of additional sources, information sidebars that relate historical issues to present-day concerns, as well as related historical documents. Readers of this work will learn what each profession entailed or entails on a daily basis, how one gained entry to the vocation, training methods, and typical compensation levels for the job. The book provides sufficient specific detail to convey a comprehensive understanding of the experiences, benefits, and downsides of a given profession. Selected accompanying documents further bring history to life by offering honest testimonies from people who actually worked in these occupations or interacted with those in that field.

Plotting the Globe Avraham Ariel, Nora Ariel Berger, 2005-12-30

People use concepts such as time and date to structure their lives on a daily basis. They often measure their travel by marking points arranged along great circles on the globe. Yet most do not understand the origin and history of these terms and the stories of the intrepid adventurers, scientists, and seafarers who shaped our picture of the world today. Ariel transports readers to faraway lands and ancient cultures that span more than 3500 years of exploration.

Phoenicians Spaniards Portuguese British French and many others star in an epic that stretches from Lapland to Cape Horn via Greenwich Paris the Andes and the Fortunate Islands This book is a collection of stories and myths about geography navigation and geodesy the science that deals with the Earth's figure and the interrelationship of selected points on its surface that reaches far beyond dry scientific texts to concentrate on the people behind the discoveries The knowledge and understanding of abstract notions such as the Prime Meridian the Equator and the International Date Line is conveyed through emphasis on the human spirit that motivated the pioneer scientists and sailors It is a tale littered with heroes and villains battles tragedies and international intrigue Readers will learn of a time when nothing was certain even the shape and size of the earth were the subjects of fierce competition conflict and politics Sarah Marek Halter,2005 People may know that Abraham the great Patriarch of the Old Testament was the first man to spread God's word But how many know of his wife Sarah How she was born into a wealthy and powerful family in the Sumerian city of Ur Or how at the age of twelve escaping her own wedding ceremony she ran to the banks of the Euphrates river and into the arms of a young stranger camped on the outskirts of the city His name was Abraham and although he was a member of a poor nomadic tribe their encounter that night was enough to convince Sarah that their future lay together And so Sarah abandoned everything wealth family and status to follow Abraham and his alien God a God of whom no one had ever heard a God who was invisible and who appeared to communicate solely through her husband a God who one day would command Abraham to kill their beloved son in his name and before whom Sarah would beg for mercy thousand years ago and in the arid wastelands of the Arabian desert Marek Halter brings an ancient world vividly to life through the eyes of a beautiful and passionate woman
