teaching but especially faculty in the social sciences can successfully employ curricular innovations classroom techniques and advances in assessment to create better learning environments for their students **Breaking Open the Box** Nancy DaFoe, 2013-02-12 What do David Foster Wallace's essay on wars over usage and Pico Iyer's comma personification have to do with improving students' academic writing? Everything. For all of the attention supposedly paid to Bloom's Taxonomy with creativity at the top, educators tend to shy away from encouraging students' creative choices in areas where traditional analysis and the critic's style and tone have reigned. While we do not want our students to write inane or empty verbiage, we unintentionally set them up for this inevitability or worse. The movement away from children's natural creative impulses in elementary school to a direction in which they literally fit their writing into preconfigured shapes is a gradual one. Although purportedly taught to instill academic structures, these boxes are also designed to facilitate the ease with which student product may be assessed. We need a more creative approach to teaching writing. A methodology incorporating creativity as modeled by students in this text demonstrates the kind of progress we are all seeking, offering an exciting challenge for young writers and educators alike.
