The Non-existence of God Nicholas Everitt, 2004 Arguments for the existence of God have taken many different forms over the centuries in The Non Existence of God Everitt considers all the arguments and examines the role that reason and knowledge play in the debate over God s existence

7 Truths That Changed the World Kenneth Richard Samples, 2012-05 Seasoned apologist examines seven truth claims that have transformed the church and turned the world upside down

The Kalām Cosmological Argument: A Reassessment Jacobus Erasmus, 2018-01-08 This book offers a discussion of the kal m cosmological argument and presents a defence of a version of that argument after critically evaluating three of the most important versions of the argument It argues that since the versions of the kal m cosmological argument defended by Philoponus c 490 c 570 al Ghaz l 1058 1111 and the contemporary philosopher William Lane Craig all deny the possibility of the existence of an actual infinite these arguments are incompatible with Platonism and the view that God foreknows an endless future This conclusion however is not a problem for the proponents of the kal m cosmological argument for the book shows how the argument can be defended without denying the possibility of the actual infinite In order to offer a comprehensive analysis of Philoponus and al Ghaz l s cosmological arguments the book draws on recent English translations of some of their works Next the book advances a detailed argument against the popular argument based on the impossibility of an actual infinite Finally the book offers a unique defence of the kal m cosmological argument by defending philosophical arguments for a beginning of time that do not deny the actual infinite evaluating which hypothesis best explains the discoveries of modern cosmology and offering an argument in support of the premise that if the universe came into existence then God brought it into existence

Mathematical Undecidability, Quantum Nonlocality and the Question of the Existence of God A. Driessen, Antoine Suarez, 2012-12-06 On January 22 1990 the late John Bell held at CERN European Laboratory for Particle Physics Geneva a seminar organized by the Center of Quantum Philosophy that at this time was an association of scientists interested in the interpretation of quantum mechanics In this seminar Bell presented once again his famous theorem Thereafter a discussion took place in which not only physical but also highly speculative epistemological and philosophical questions were vividly debated The list of topics included assumption of free will in Bell s theorem the understanding of mind the relationship between the mathematical and the physical world the existence of unobservable causes and the limits of human knowledge in mathematics and physics Encouraged by this stimulating discussion some of the participants decided to found an Institute for Interdisciplinary Studies IIS to promote philosophical and interdisciplinary reflection on the advances of science Meanwhile the IIS has associated its activities with the Swiss foundation Fondation du Leman and the Dutch foundation Stichting Instudo registered in Geneva and Amsterdam respectively With its activities the IIS intends to strengthen the unity between the professional activities in science and the reflection on fundamental philosophical questions In addition the interdisciplinary approach is expected to give a

contribution to the progress of science and the socio economic development At present three working groups are active within the IIS i e the Center for Quantum Philosophy the Wealth Creation and Sustainable Development Group the Neural Science Group You Can Lead an Atheist to Evidence, But You Can't Make Him Think Ray Comfort,2009 I find it so encouraging that in these challenging times of culture wars Christian leaders like my friend Ray Comfort are passionately defending the authority of the Bible from its very first verse *Understanding Philosophy of Religion Aqa Text Book* Libby Ahluwalia,2008-08 A thorough and detailed approach to the material makes this subject accessible for all AS and A2 students and will particularly help ensure higher achieving students attain their best grades For use with the 2008 AQA specification Each Textbook has an accompanying Teacher s Book containing much of the active learning and testing of knowledge and skills They contain discussion ideas worksheets revision tests and games as well as sample exam questions and mark schemes There is a Textbook and Teacher s Book for each major exam board *The Case Against Theism* Raphael Lataster,2018-06-14 This monograph offers a critique of arguments for the existence of a specifically Christian God advanced by prominent scholar William Lane Craig The discussion incorporates philosophical mathematical scientific historical and sociological approaches The author does not seek to criticize religion in general or Christianity specifically Rather he examines the modern and relatively sophisticated evidential case for Christian theism Scholars have been arguing for theism or naturalism for centuries and there seems little to add to the discussion especially from the theistic side However to assume that either theism or naturalism obtains is a false dichotomy There are alternatives to both that merit consideration Employing a probabilistic approach the author advances this discussion His work uniquely utilizes not only naturalistic hypotheses to argue against theism It also presents supernaturalistic hypotheses This leaves no question that theism is almost certainly false even if some form of divine reality exists This project seeks not to argue that Christianity or any other faith or religion is undesirable but only to critically examine evidentialist claims posited by Christianity s learned apologists In fact a major secondary aim is to consider alternative god conceptions such as polytheism and pantheism This work aims to highlight that Christian theism is often granted special privileges by theistic philosophers of religion which seems doubly inappropriate when certain alternative god conceptions may even prove to be more plausible *The Case for Faith* Lee Strobel,2000 Finds the author investigating the nettlesome issues and doubts of the heart that threaten faith Eight major topics are addressed including doubt the problem of pain and the existence of evil Publisher s website *Reasoning about God* Harry J Gensler,2022-08-11 Reasoning about God is an introduction to philosophy of religion meeting college students where they are with their own doubts and questions Each chapter begins with a passage from a fictional student who raises intellectual problems against God which is followed by the author s informed and easy to understand analysis This debate structure allows student readers to clearly see the clash of ideas gets them involved in the issues and encourages their critical thinking since students are pushed to find flaws in the ideas It emulates the structure the author followed

successfully in his *Ethics A Contemporary Introduction* which is now in its third edition and has been translated five times into other languages This structure works well in philosophy of religion even better than in does in ethics Key Features of Reasoning about God Written clearly and concisely making difficult issues easy to understand Makes a strong case for belief in God based on various factors including arguments about fine tuning Kalam and near death experiences as well as approaches that are more instinctual or emotional A major theme of the book is There are many paths to God Includes material on both traditional topics of philosophy of religion like the problem of evil and other related topics of interest like whether religion is harmful life after death the variety of world religions and the meaning of life Explores how science connects to God s existence arguing that recent science is friendlier toward religion than older science Written by a Christian author whose defense of belief in God works with other theistic traditions as well like Islam and Judaism

Reincarnation in the Bible? Dan Carlton,2013-10-24 In my early twenties I read a book that started me in a completely different direction Up to that time I had been taught to be agnostic and believed the Bible to be the result of ignorant men trying to explain what they did not understand with superstition fables exaggerated history etc The book is *There is a River* by Thomas Sugrue A few years ago I started writing down my conclusions in order to clarify to myself just what I did believe I could not accept the idea that I could be right when everyone I talked to disagreed with me And yet my conclusions do seem to me to agree with Scripture including my belief in reincarnation which I believe is not only a fact revealed in the Bible but is a necessary part of Gods plan of salvation A motivating factor in my desire to share my understanding of truth is my belief that all of the problems in the world can be traced to erroneous beliefs If everyone correctly understood and applied truth I believe our problems would vanish God says we become what we think Pr 23 7 My belief that the Bible teaches that reincarnation is a fact hasnt endeared me to those who not only reject such an idea but also sincerely believe such a belief comes from the pit of hell and smells of smoke After reading *Reincarnation in the Bible* perhaps you can show me where I am in error if you disagree with me Or who knows perhaps you will agree with me At any rate I hope you find my book interesting and enjoyable if not enlightening

A Place of Wonder Chase Adonai Trudeau (CAT),2022-06-24 Many people I have loved and who are no longer on this earth and many people I still love believe that a scientific way of thinking has removed the mysteries that led less educated people to believe in a god They think the scientific advances demonstrate superior scientific thinking that has led to the erosion of the foundations of faith an erosion that no longer supports rational faith If someone you love thinks along these lines this book may be for them

Essential Quotes for Scientists and Engineers Konstantin K. Likharev,2021-02-27 This book brings together about 2 500 quotations on various topics of interest to scientists and engineers including students of STEM disciplines Careful curation of the material by the editor provides the reader with far greater value than can be obtained by searching the internet The quotes have been selected for various attributes including importance of topic depth of insight and not least wit with many of them satisfying all these criteria To make sequential

reading of the quotes more engaging they are grouped into broad topical sections and the entries within each section are organized thematically forming quasi continuous narrative threads The text and authorship of each quote have been carefully verified and the most popular cases of misquotation and misattribution are noted The book represents a valuable resource for those writing science and engineering articles as well as being a joy to read in its own right Readings in Philosophy of Religion Linda Zagzebski, Timothy D. Miller, 2009-03-30 Comprised of readings from ancient to modern times this volume offers a comprehensive introduction to the central questions of the philosophy of religion Provides a history of the philosophy of religion from antiquity up to the twentieth century Each section is preceded by extensive commentary written by the editors followed by readings that are arranged chronologically Designed to be accessible to both undergraduate and graduate students

Atheism In Nigeria: A Review Of Their Reproofs Emmanuel Aghado, 2013-12-05 This is an essay that debunked the Nigerian Atheists claims and accusations against Christianity No matter how they level such accusations there is always a rebuttal This essay was written to help Christians expose the fallacies in the line of argument used by Nigerian Atheists

Science, Religion, and the Search for Extraterrestrial Intelligence David Wilkinson, 2013-08 This book is about the search for extraterrestrial intelligence taking seriously the current scientific arguments and its implications for religion

God, Time, and Eternity W.L. Craig, 2013-03-14 Those who think about time are thinking deeply Those who think about God are thinking even more deeply still Those who try to think about God and time are pressing the very limits of human understanding Undaunted this is precisely the project which we have set for ourselves in this study to try to grasp the nature of divine eternity to understand what is meant by the affirmation that God is eternal to formulate a coherent doctrine of God's relationship with time This study the second installment of a long range research program devoted to a philosophical analysis of the principal attributes of God flows naturally out of my previous exploration of divine omniscience For the most contentious issue with respect to God's being omniscient concerns divine foreknowledge of future contingents such as free acts of human agents The very concept of foreknowledge presupposes that God is temporal and a good many thinkers from Boethius to certain contemporary philosophers have thought to avoid the alleged incompatibility of divine foreknowledge and human freedom by affirming the timelessness of God Thus in examining the complex of issues surrounding the foreknowledge question we found ourselves already immersed in the question of divine eternity

S.G.E.B. 2nd Edition Steve J. Williams, 2009-08-14 The information age has begotten turmoil It seems that the more information we have the less peace the average person has To many an impression has developed that modern science has disproven the existence of the metaphysical realm and doomed us to a sterile pointless wandering in the wilderness of minutiae This couldn't be further from the truth A reasonably skeptical look at modern philosophy science archeology and history point overwhelmingly in a single direction and the truth that it points to is blissful and eternal

2013 Update To Esoptrics' Try To End The Notion Of The Continuum & The "Absurd" Math It Begets Edward N. Haas, 2014-01-08 For at least 2 500 years

now one of the most if not the most hotly widely and often contested issues is the notion of the continuum It s a notion which looks upon time space locomotion and change as continuous which is to say it implies there is no limit to the smallness of the smallest segment of each Thereby it necessarily invokes the notion of in finite divisibility The latter then demands mathematical conclusions so mani festly self contradictory they boggle the mind no less than does the notion of a square cir cle No won der then they move many a renowned thinker such as John Locke and David Hume to proclaim those conclusions absurd See my quotes from them on pages II VIII

The Teleological and Kalam Cosmological Arguments Revisited Andrew

Loke,2022-05-03 A prominent issue in many contemporary philosophy of religion debates concerns whether the universe has a Designer This book moves the discussion ahead in a significant way by devising an original deductive formulation of the Teleological Argument TA which demonstrates that the following are the only possible categories of hypotheses concerning fine tuning and order i chance ii regularity iii combinations of regularity and chance iv uncaused and v design This book also demonstrates that there are essential features of each category such that while the alternatives to design are unlikely the Design Hypothesis is not and that one can argue for design by exclusion without having to first assign a prior probability for design By combining the TA with the Kalam Cosmological Argument KCA which it defends against various objections this book responds to the God of the gaps objection by demonstrating that the conclusion of the KCA TA is not based on gaps which can be filled by further scientific progress but follows from deduction and exclusion This is an open access book
