**The Biology and Identification of the Coccidia (Apicomplexa) of Carnivores of the World** Donald W. Duszynski, Jana Kvičerová, R. Scott Seville, 2018-06-29 The fundamental concept of The Biology and Identification of the Coccidia Apicomplexa of Carnivores of the World is to provide an up to date reference guide to the identification taxonomy and known biology of apicomplexan intestinal and tissue parasites of carnivores including but not limited to geographic distribution prevalence sporulation prepatent and patent periods sites of infection in the definitive and if known intermediate hosts endogenous development cross transmission pathology phylogeny and if known their treatments These data will allow easy parasite recognition with a summation of virtually everything now known about the biology of each parasite species covered The last very modest and only treatise published on this subject was in 1981 so this book fills a fundamental gap in our knowledge of what is now known and what is not about the coccidian parasites that infect and sometimes kill carnivores and or their prey that can harbor intermediate

stages including many domestic and game animals Offers line drawings and photomicrographs of many parasite species that will allow easy diagnosis and identification by both laypersons and professionals veterinarians wildlife biologists etc Presents a complete historical rendition of all known publications on carnivore coccidia for all carnivore families and evaluates the scientific and scholarly merit of each apicomplexan species relative to the current body of knowledge Provides a complete species analysis and their known biology of all coccidia described from each carnivore lineage and species Reviews the most current taxonomy of carnivores and their phylogenetic relationships to help assess host specificity patterns that may be apparent Evaluates what little cross transmission work is available to help understand the complexities of those coccidians that use two hosts e g Sarcocystis Besnoitia and others Provides known treatments for the various parasite genera species

Low-Cost Veterinary Clinical Diagnostics Ryane E. Englar, Sharon M. Dial, 2022-11-23 Low Cost Veterinary Clinical Diagnostics A practical guide to maximizing the diagnostic value of in house quick assessment tests QATs In Low Cost Veterinary Clinical Diagnostics the authors provide a hands on resource designed to facilitate healthcare delivery across the spectrum of care Historically clinicians have been taught to apply the gold standard approach to the practice of medicine However recent advances in veterinary medical care and associated technologies have made practitioners question whether a one size fits all approach is truly best After all when we perform diagnostic tests are we testing out of the desire for completeness to cover all bases for the good of the patient Or are we testing because we are expected to The reality is that gold standard care is not always advisable and not always possible In clinical practice veterinarians frequently encounter obstacles that limit their approaches to case management Cost of care is a significant constraint that requires practitioners to rethink which diagnostic tests are essential Not every patient requires a complete blood count CBC chemistry profile urinalysis and fecal analysis to obtain diagnostic value This text suggests that the best approach to case management be determined by the situation the context the patient and the client While sophisticated panels of tests may remain the recommended approach to case management Low Cost Veterinary Clinical Diagnostics outlines entry level in house diagnostic blood urine fecal and body cavity fluid tests how to perform them as well as the breadth and depth of patient specific data that can be gleaned from quick assessment tests QATs Readers will also find A thorough introduction to patient care considerations communication strategies that facilitate cost conscious shared decision making Comprehensive explorations of quick assessment tests QATs in hematology including packed cell volume PCV total solids TS buffy coat analysis blood smears blood glucose blood urea nitrogen BUN saline agglutination tests and activated clotting time Practical discussions of quick assessment tests QATs involving urine including urine color dipstick analysis specific gravity USG and urine sediment analysis Pragmatic evaluation of fecal analysis including considerations surrounding fecal color volume consistency and odor saline smears or wet mounts and fecal flotation Discussion on body cavity fluid analysis Sample case vignettes complete with question and answer Q A Perfect for veterinary practitioners veterinary technicians veterinary and
