Responsibility to Protect and Women, Peace and Security Sara E. Davies, Zim Nwokora, Eli Stamnes, Sarah Teitt, 2013-08-08 In Responsibility to Protect and Women Peace and Security Aligning the Protection Agendas editors Davies Nwokora Stamnes and Teitt address the intersections of the Responsibility to Protect R2P principle and the Women Peace and Security WPS agenda Widespread or systematic sexual or gender based violence is a war crime a crime against humanity and an act of genocide all of which are clearly addressed in the R2P principle The protection of those at risk of widespread sexual violence is therefore not only relative to the Women Peace and Security WPS agenda but a fundamental sovereign obligation for all states as part of their commitment to R2P Contributions from policy makers and academics consider both the merits and the utility of aligning the protection agendas of R2P and WPS Ultimately a number of actionable recommendations are made concerning a unification of the agendas to best support the global empowerment of women and prevention of mass atrocities *Human Resource Management in Construction* Andrew Dainty, Martin Loosemore, 2012 The construction sector is one of the most complex and problematic arenas within which to manage people As a result the applicability of much mainstream human resource management HRM

theory to this industry is limited. Indeed the operational realities faced by construction organizations mean that all too often the needs of employees are subjugated by performance concerns. This has potentially dire consequences for those who work in the industry for the firms that employ them and ultimately for the prosperity and productivity of the industry as a whole. In this new edition of their leading text, Andrew Dainty and Martin Loosemore have assembled a collection of perspectives which critically examine key aspects of the HRM function in the context of contemporary construction organizations. Rather than simply update the previous edition, the aim of this second edition is to provide a more critical commentary on the ways in which the industry addresses the HRM function and how this affects those who work within the industry. To this end, the editors have gathered contributions from many of the leading thinkers within construction HRM to critique the perspectives presented in the first edition. Each contributor either tackles specific aspects of the HRM function or provides a critical commentary on industry practice. The authors explain, using real life case studies, the ways in which construction firms respond to the myriad pressures that they face through their HRM practices. Together, the contributions encourage the reader to rethink the HRM function and its role in defining the employment relationship. This provides essential reading for students of construction and project management and reflective practitioners who are interested in theoretically informed insights into industry practice and its implications.

Women of Power Torild Skard, 2015-03-09. At a time when a woman, Angela Merkel, is arguably the most powerful leader in Europe and another Hilary Clinton continues to be at the center of the US political stage, it seems that women have broken through the glass ceiling and begun to populate the highest offices of the political world. *Women of Power* is a testament to that accomplishment, offering the most comprehensive overview of female presidents and prime ministers to date. Looking at over fifty countries and over seventy women leaders since 1960, Torild Skard herself, an experienced politician, examines how and why these women rose to the top and what their leadership has meant for women's empowerment throughout the latter half of the twentieth century. Skard examines the achievements and life stories of the world's female leaders up to the current era. She offers nuanced portraits that draw on a number of materials, including many interviews that she conducted herself. All of the women discussed are organized by both chronology and geography, and Skard includes a number of helpful chapters that provide an overview and assessment of how different women leaders have come to power in different regions. Overall, the book provides a fascinating account of women's empowerment as it has manifested itself at the very top of the political hierarchy.

Handbook of Narrative Analysis Luc Herman, Bart Vervaeck, 2019-12. Stories are everywhere, from fiction across media to politics and personal identity. *Handbook of Narrative Analysis* sorts out both traditional and recent narrative theories, providing the necessary skills to interpret any story. Forster, related theorists Franz Stanzel, Dorrit Cohn, and a large variety of postclassical critics. Among the latter, particular attention is paid to rhetorical, cognitive, and cultural approaches.
