

The Solution to World Hunger

Describing how hunger affects the body and is prevalent in the world, varying from place to place with options of how to fix it.

Issues

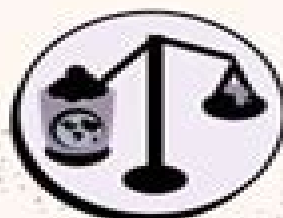

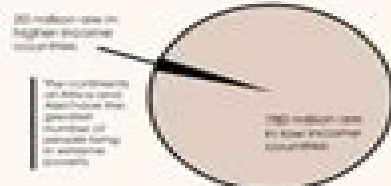

The histories of different countries, economic growth influence how they see how Northern countries like Europe can better off now because of early economic success. Southern countries such as Egypt focus on specialized exports to countries that can't wait off until until the amount of food that can be bought on imports. Colonization was a major part of this.

Global institutions such as the World Bank and International Monetary Fund were created after WWII in order to provide financial solutions to hunger. Debt increased as they needed structural adjustment programs (SAPs) to be in place to enjoy the debt free, but it also contributed to negative impact on countries such as women. Overall, the debt placed a larger burden on the lower class.

Roughly 12.1% of deaths among children under 5 are attributed to wasting due to height/weight malnutrition

800 million Undernourished

Food waste in the whole world is 8 times more than food loss in Africa.

1.7% decrease in hunger

Undernourishment in the Total Population (2016-18)

Lowest undernourishment and population growth rates in the world are found in North America, Europe, and Oceania. In the last 10 years, the population in these regions has grown by less than 1%.

Effects of Hunger on the Body

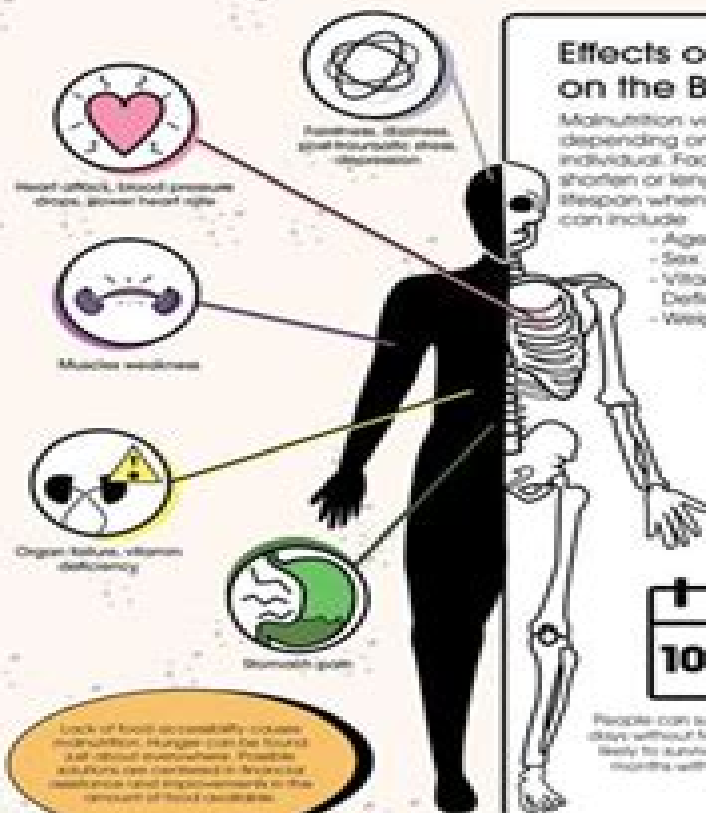

Malnutrition varies depending on the individual. Factors that can shorten or lengthen your lifespan when you lack food can include:

- Age
- Sex
- Vitamin Deficiencies
- Weight

But must be of weight 1.2 for women and 1.1 for men for normal functioning

10-14

People can survive about 10-14 days without food and water. It's easy to survive weeks, or even months with enough water.

Lack of food eventually causes malnutrition. Hunger can be found in all areas worldwide. People who are in countries with food shortages and malnutrition are in the amount of food shortage.
