A History of British Eugenics since 1865 David Redvaldsen,2024-11-09 This book examines British eugenics from its origins in 1865 to the early 1990s It considers the two institutions promoting the doctrine the Galton Laboratory attached to the University of London and the Eugenics Society It charts internal and ideological changes across more than a century seeing eugenics as primarily a political movement The doctrine had influence on British society and guided adherents ranging from scientists to charitable ladies The Galton Laboratory published detailed studies of heredity It transformed itself into a centre for medical genetics after the Second World War As early as the 1920s the Eugenics Society was the mainspring of the doctrine formulating what became the British version of an international ideology It began as applied social Darwinism later incorporating a greater degree of meritocracy and amelioration Its support for sterilization in the 1930s eroded the kudos it had gained in policy making circles From the 1960s organized eugenics was especially a forum for learned and popular discussion of biology and sociology Medical advances after 1970 aided its continuation notably the growth of assisted reproductive technologies The book presents British eugenics as mostly shaped by domestic concerns offering new revelations and interpretations with the capacity to readjust historical thinking It also covers contemporary bioethical and
