Genocide in the Modern Age Zachary A. Karazsia, 2025-01-30 This book explores why some episodes of mass political violence and genocide are so much deadlier than others and under what conditions perpetrators in government and society opt for brutality as a means of accomplishing their goals. Introducing the new concept of mass political violence to explain genocide and other mass killings in the modern world, the author investigates how perpetrators sustain the capacity to enact violence on a large scale irrespective of motives. Cases including the Holocaust, Soviet Union, Rwanda, Cambodia, the Lord's Resistance Army, the Islamic State, the Ottoman Empire of the 1890s, Mao Zedong's revolutionary violence, the Congo Crisis, and Darfur are used by the author to identify four types of mass political violence perpetrators: state actors, state-society coalitions, state-sponsored groups, and non-state actors to explain historical trends and identify which perpetrators are most likely to emerge in a given socio-political context and sustain violence over time. Comparative and grounded in case studies, this book will interest policymakers, diplomats, governmental advisers, practitioners, and industry researchers. It will also be invaluable to students and scholars of Political Science, International Affairs, Holocaust and Genocide Studies, Human Rights, Sociology, Anthropology, Geography, Political Psychology, Religious Studies, Gender Studies, Public Policy, Media Studies, and Criminology.

God and Randomness Thomas R. McFaul, Al Brunsting, 2017-12-01 Most of us have experienced the impact of randomness in our lives, not only as individuals but in our interactions with others as well. In *God and Randomness*, which is a sequel to our 2014 publication *God Is Here to Stay: Science, Evolution, and Belief in God*, we describe the connection between randomness and God and how this connection has permeated our universe from the start. We cover several areas that include personal stories, the micro and macro sources of world events, the origins of our cosmos and solar system, the emergence of human mindfulness and choice, major episodes of the twentieth century, the future, and the quest for fairness. In the course of examining these topics, we identify how current scientific research is consistent with our speculation of how God influences our lives in the presence of all this randomness. We conclude that the random events affecting us may originate in other dimensions that are inaccessible to us and that God is actively at work in the chaos and randomness that pervades our lives and our world.

Truths about Evil, Sin, and the Demonic Byron Belitsos, 2023-04-18 The Problem of Evil and the Predicament of Theodicy. As Christians or theists, we are moved to share the truth of God's love for humankind. But how can we speak of such providential care in a world rife with crime, war, racism, genocide, and even ecocide? In response to this predicament, a theodicy proposes a rational defense of God's goodness that offers consolation to victims and hope to all believers. *Truths about Evil, Sin, and the Demonic* provides a sweeping history of the discipline of theodicy that focuses on its strategic turning points and its possible future. Belitsos argues that because of the atrocities of the last century and the threat of horrendous evils in the coming century, we need to marshal the most explanatory elements of all previous theodicies and then drive toward an integrative model based on a creative synthesis. The author also turns to a modern revelatory source that supports his argument for such a meta-theodicy.

He concludes by critically engaging with this source and the entire tradition in his call for an apophatically informed integral theodicy

Only the Dead Bear F. Braumoeller, 2019 In *Only the Dead* Braumoeller assesses the claim that armed conflict is in decline and finds it wanting In the course of his assessment he also develops a powerful explanation for trends in warfare over time His central finding is that although there has been a drop in the rate of international conflict following the end of the Cold War that drop followed nearly two centuries of steady increases in the rate of conflict initiation

The Lens of Ecological Law Carla Sbert, 2020-04-24 Containing an in depth study of the emerging theory and core of ecological law this book insightfully proposes a lens of ecological law through which the disparity between current laws and ecological law can be assessed The lens consists of three principles ecocentrism ecological primacy and ecological justice These principles are used within the book to explore and analyse the challenges and opportunities related to the transition to ecological law and to examine three key mining case studies

The Writing of the Gods Edward Dolnick, 2022-11-22 Carved in ancient Egypt the Rosetta Stone carried the same message in different languages in Greek using Greek letters and in Egyptian using picture writing called hieroglyphs Until its discovery no one in the world knew how to read the hieroglyphs that covered every temple and text and statue in Egypt Dominating the world for thirty centuries ancient Egypt was the mightiest empire the world had ever known yet everything about it the pyramids mummies the Sphinx was shrouded in mystery Whoever was able to decipher the Rosetta Stone and learn how to read hieroglyphs would solve that mystery and fling open a door that had been locked for two thousand years Two brilliant rivals set out to win that prize
