

Atlas of Science Literacy

Two Volumes Map K–12 Science Learning

Science literacy depends on knowledge that is richly interconnected, forming a coherent understanding of the world and how it works. *Atlas of Science Literacy, Volume 2*, Project 2061's newest tool for educators, is helping teachers across the country see how students might develop this coherent understanding as they move from kindergarten through 12th grade. Co-published by Project 2061 and the National Science Teachers Association, *Atlas 2* joins the original *Atlas 1* in giving teachers a new perspective on K–12 learning in science, mathematics, and technology.

With the publication of *Atlas 2*, the *Atlas* volumes now include nearly 100 conceptual strand maps that chart all of the learning goals specified in Project 2061's *Benchmarks for Science Literacy*. *Benchmarks* was derived from the recommendations for adult science literacy proposed in Project 2061's landmark report *Science for All Americans*. By providing a visual display of the *Benchmarks* learning goals, the *Atlas* maps make it easier for teachers to see the relationships among ideas within and across core topics.

The *Atlas* maps—and commentary on the maps—offer educators the “big picture” of

what students can be expected to learn in different grades and foster the design of more coherent curriculum, instruction, and assessment. When these three elements promote coherence, science literacy can be approached not as a compilation of isolated bits of information and abilities, but as a rich fabric of mutually supporting ideas and skills that must develop over time.

What's New in *Atlas 2*

In addition to contributing new maps to *Atlas* chapters that were not fully covered in Volume 1, Volume 2 introduces maps for two chapters that were not covered at all in the earlier volume. Chapter 30: Historical Perspectives introduces nine new maps on important episodes of scientific discovery, including maps on The Copernican Revolution, Relativity, Splitting the Atom, and Explaining Evolution. Chapter 32: Habits of Mind presents six maps that deal with attitudes, skills, and values that are essential to science literacy (see Values in Science map on page 4).

Also new to *Atlas 2* are improvements to the maps themselves. Based on feedback from participants in Project 2061's *Atlas* workshops, on the needs of curriculum materials developers, and on Project 2061's own work clarifying what particular benchmarks expect students to know, the new volume incorporates the following enhancements:

- **Increased Coherence:** *Atlas 2* identifies a wider array of important connections among key ideas and shows these connections explicitly in the maps. Off-map Connections show links to the codes of related bench-
